Israeli Vote Paves Way For Early **Elections**

WEATHER DATA APPEAR ON PAGE 16

No. 31.443

By Edward Walsh

JERUSALEM — The Israeli arliament voted Thursday night o dissolve itself and hold new par-iamentary elections later in the

The 61-to-58 vote to advance the late of elections, which had been cheduled for 1985, was a prelimi-nary step still requiring parliamen-ary action, including the setting of a date. But at the end of a day of olitical maneuvering, the vote de-ermined that Israeli voters will go o the polls before the end of 1984.

* The elections could be as early as day or June if the main opposition abor Party and its allies get their ay, or as late as the fall if the overnment of Prime Minister itzhak Shamir succeeds in a series f delaying tactics.

However, Thursday night's vote, fter a rancous Knesset session, asared the holding of early elections nd a national debate not only on ne dominant issue of the domest conomy but also on the situation 1 Lebanon and Israel's policy in 12 occupied West Bank and Gaza

The challenge to the Shamir gov-rament began to develop dramatially Monday night, when the leadof a small party that is part of the x-party government coalition an-ounced that his group was hreak-ig ranks and would vote for the

- That appeared to give the oppotion sufficient votes, but it did not revent the government from some inneuvers to prevent approval of ie bill. The coalition appeared on ne verge of success earlier Thursay as a three-member parliamen-ay delegation flew back to Israel om a tour of Argentina. On board bo had been expected to vote with the next elections.

the opposition hut was said to be rushing back to vote against early

Adding to the drama was the question of whether former Prime Minister Menachem Begin would appear in the Knesset for the first time in more than seven months to support his successor, Mr. Shamir. Mr. Begin resigned as prime minister last September, but he has retained his seat in the Knesset.

It was thought that if Mr. Begin appeared to vote with the government, Mr. Zeigerman's vote would be decisive in determining the out-

In the end, Mr. Zeigerman did vote with the government while Mr. Begin was the only member of the 120-member Knesset who was absent. But the question of Mr. Begin's presence was mooted earlier in the day when another maverick coalition member, Mordechai Ben-Porat, also defected and announced that he would vote for the

The prospect of elections this year is certain to produce months of political turmoil in Israel, including a likely challenge to Mr. Shamir's leadership of the ruling Likud bloc, Deputy Prime Minister David Levy, who unsuccessfully sought party leadership against Mr. Shamir after the Begin resignation, has not ruled out another attempt to supplant Mr. Shamir.

In addition, former Defense e flight was Dror Zeigerman, a Minister Ariel Sharon has said he averick member of the coalition will seek to lead the Likud bloc in

Minimum Tax Sought On Americans Abroad

By Robert C. Siner

- International Herald Tribune WASHINGTON - Provisions at would sharply increase the taxof many Americans working in w-tax foreign countries have been icluded in a deficit-reduction schage approved by the Senate inance Committee.

..... The \$74-billion package includes nguage that would require all mericans abroad who file returns ... aiming the income exclusion and rusing deduction to also compute alternative minimum tax and - 1y the greater of the two.

However, this minimum tax suld be offset, on a dollar-forallar basis, by income taxes paid a foreign country. The tax would : totally offset for any American sying foreign income taxes at a FAGES "the of 20 percent or higher.

FOR #5 The new minimum tax would be CLASC imputed by adding all income id allowances, and then subtractga \$30,000 income exemption for dividuals (\$40,000 for a married filing a joint return), the and deduction or itemized deduc-

ons. The alternative the remainder. Husbands and ives filing separate returns would ich be allowed a \$20,000 exemp-

TO OUR READERS

Distribution of the International Herald Tribune was disrupted Thursday because of a nationwide work stoppage by French printers.

nuses, a \$20,000 housing allowallowance and a \$4,000 home-leave allowance would owe no U.S. income tax if they used the income exclusion of \$80,000 under Section 911 of the U.S. tax code and the

housing deduction. To determine the new alternative minimum tax. the couple would add the salary and all allowances, totaling \$89,000 of adjusted gross income. From this they would subtract the income exemption (\$40,000), the four personal exemptions (\$4,000), and the standard deduction (\$3,400) — a total of \$47,400 — leaving \$41,600 in taxable income. The alternative minimum tax would be 20 percent of this, or \$8,320.

If the couple had paid \$8,000 in foreign income taxes, their U.S. tax liability would be \$320. If they paid no foreign income tax, as is the case in most Middle Eastern countries, they would owe the full \$8,320.

The minimum tax was proposed by Senator John C. Danforth, a Republican of Missouri, who was a strong supporter of tax relief for Americans abroad during the five-year battle that produced the present income exclusion.

An aide, asked why the senator had proposed the minimum tax, said that it was in line with his longheld belief that all Americans should pay some tax.

The Finance Committee's bill, approved Wednesday night, is being held off the Senate floor until other committees complete work on spending cuts. Chairman Robert J. Dole, a Republican of Kansas, has said he hoped that floor action could be completed before the Senate's Easter recess begins April 13, but this is considered un-

If the bill were passed by the Senate, it would still have to be reconciled with a \$49.3-billion tax bill passed by the House Ways and Means Committee earlier this month. This bill also is being held off the floor while other commit-

tees take action on spending cuts. The House bill does not contain a minimum tax provision for Americans abroad. Instead, it would postpone three scheduled increases that would bring the earned income exclusion from \$80,000 for income earned in 1983 to \$85,000 in 1984, 590,000 in 1985, and \$95,000 in 1986. These increases would take effect in 1987, 1988 and

1989 under the House bill. Ben Brown, director of the Tax Fairness Committee, a lohhying arm of the construction industry, said that his group would lobby to have the minimum-tax provisions taken out of the bill either on the Senate floor or in a Senate-House

Salvadoran Said to Be **Informant** For CIA

By Philip Taubman New York Times Service

WASHINGTON - The head of El Salvador's Treasury Police has been a paid informant for the Central Intelligence Agency since the late 1970s, according to U.S. offi-

The Treasury Police has long been considered the least disci-plined and most brutal of the Salvadoran security forces, and some of the members have been linked by the Reagan administration to death squad activities. The U.S. officials, who are famil-

iar with CIA activities in El Salvador, said that the Treasury Police chief, Colonel Nicolas Carranza, had received more than \$90,000 a year from the CIA as an informant for the past five or six years. A former Salvadoran official, in

an article published in The New York Times on March 3, said that Salvadoran military and civilian leaders were involved in organizing and directing death squads. Colonel Carranza was one of those he implicated in terrorist acts.

The Treasury Police's head of intelligence, Major José Ricardo Pozo, was removed from his job late last year after the Reagan ad-ministration pressed the Salvador-an government to take action against security officials who were inked to the death squads, according to State Department officials. The U.S. officials maintained, however, that there was no credible evidence that Colonel Carranza was personally involved with the death squads.

The White House on Thursday denied any link between the CIA and officials implicated in death squads, United Press International

[The White House spokesman, Larry M. Speakes, said the CIA "scrupulously" ahides by an executive order barring U.S. involvement in assassinations. The agency "does not employ people whom it believes have been or are currently engaged in assassination activi-

U.K. Postpones A Decision on Withholding Its EC Payments

LONDON - Prime Minister Margaret Thatcher told Parliament on Thursday that she has postpened a decision on whether to freeze British payments to the Eu-

ropean Community.

Mrs. Thatcher met with her cabinet for three hours and then told the House of Commons that she would wait to see the results of an emergency meeting of community foreign ministers in Brussels on

But she also said she would make no move to meet the EC's request for a \$143-million advance pay-ment on Britain's April contribu-

Noting that France, which holds the rotating chairmanship of the 10-nation community, had called the meeting of foreign ministers in Brussels on Tuesday after the collapse of this week's summit meeting, Mrs. Thatcher said:

We welcome this initiative, and in these circumstances the government will take no action that might damage the prospects of decisive progress next week." But she added: "In the mean-

time, we shall not ask the House to consider a supplementary estimate for an advance payment to the community. We shall consider our position on that request in the light

of the outcome of the meeting."

Mrs. Thatcher told the Commons on Wednesday that the blocking of the British refund agreed npon eight months ago "was unwise and will sour relations."

"One can't go on as if nothing has happened," she said, "It's almost intolerable that one should be expected to send a supplementary in the face of what has happened. in recent months, member nations have made advance contribu-

tions to keep the community afloat financially. Holding up an advance payment would not so clearly vioate the community treaty as would withholding regular contributions. Mrs. Thatcher is widely blamed for the failure of this week's Brus-

sels meeting, which ended with blocked a rebate of 750 million European Currency Units (\$638

million) due March 31 on Britain's Any role played by Mr. Meese 1983 contributions. ciliatory mood emerged during the the government had decided to "play it cool."

The EC has been deadlocked for months on Britain's complaint that it bears too high a proportion of the community's cost although it is one of its poorest members.

This is because it benefits to a lesser extent than its neighbors from agricultural subsidies; it also still imports much of its food from outside the community and thus has to pay levies on it to the EC.

The summit deadlock meant that the community would soon run out of money to pay the growing cost of its farm-support program.

Mrs. Thatcher called the EC's decision to block last year's rebate "reprehensible." She had warned in Brussels that unless that money was paid by March 31 she would freeze Britain's membership dues.

This would be illegal under the Treaty of Rome, which Britain signed in 1973 when it joined the

tween Lebanese Army soldiers in the stronghold of Souk el Gharb and Druze militiamen based in the villages of Aitat, Aley and Kaifoun.

Commenting on the Lausanne talks, the White House spokesman, Larry M. Speakes, said in Washington that the Reagan administration was "disappointed the conferess have been unable to make greater progress toward national reconciliation. We hope the parties will continue to work to make more meaningful the fragile cease-fire that now exists."

Donald H. Rumsfeld, the special U.S. envoy to the Middle East, arrived in Cairo on Thursday for a 24-hour visit and met for two hours with President Hosni Mubarak.

(Reuters, UPI, AP)

By Bernard Gwertzman New York Times Service

WASHINGTON - By announcing that it was canceling plans to sell advanced anti-aircraft missiles to Jordan and Saudi Arabia, the Reagan administration appears to have bowed to supporters of Israel in Washington. In the process, the administration ignored the views of the State Department's own experts on the Arab world.

The sudden cancellation Wednesday, following the public denunciation of Washington by King Hussein of Jordan, climaxed a string of setbacks to U.S. policy in the Middle East. On Feb. 7, President Ronald Reagan ordered U.S. Marines moved from Beirut International Airport to ships offsbore. On March 5, the U.S.-sponsored disengagement accord of last May 17 between Israel and Lebanon was canceled by the Lebanese government under pressure from Syria.

There is now a widespread perception among officials in Washington and in other capitals that the administration is mishandling the Middle East, 2 region that is once thought would offer opportunities for a foreign policy success

"Our whole Mideast policy is in a state of drift," a State Department official said, with the administra-tion now limited to listening to what others have to offer. He said the situation was far different in Sep-

WORLD BRIEFS

Strike Halts Trade, Transport in Peru

LIMA (AP) - Much of the nation's commerce and public transporta-

tion were interrupted Thursday by a 24-hour general strike called to protest the government's economic policies.

The walkout was called by the nation's leftist-dominated unions. Strikers briefly blocked the Pan-American Highway with rocks and burning tires, but the police said they cleared the road. The strike was called to protest government policies that the unions said were responsi-ble for an inflation rate of 130 percent and a 20 percent jump in.)!

The police sent armed patrols into Lima's streets following a series of bombings by Marxist guerrillas Wednesday night. Two guerrillas, two policemen and a passerby were injured in the bombings, the police said. The injured rebels were arrested.

80 Percent of U.K. Mines Shut Down LONDON (UPI) - Miners picketed in record numbers Thursday

closing down about 80 percent of Britain's mines, despite a massive police By mid-afternoon Thursday, an estimated 5,000 traveling pickets had

brought 137 of the nation's 175 mines to a halt, leaving only 38 functioning. Many miners who had voted to continue working despite union calls for a nationwide strike ignored the pickets and reported for work. About 8,000 police officers guarded mines to ensure that no violence erupted between the divided miners. One miner died in clashes

Scotland Yard, which is coordinating the huge police operation, said 4: pickets had been arrested from Wednesday afternoon to Thursday. They said a total of 96 people, most of them charged with obstruction, had been arrested in the nine-day strike to protest pit closures.

French Trucks End Spanish Blockade

IRUN, Spain (UPI) — French truck drivers Thursday ended their 60-boar blockade of the western Spainish border on a promise from Spain of police reinforcements to protect them from anti-French gangs. Meeting in the village of Ondarroa, however, Spanish Basque fisher men vowed that despite the increased security, they would renew attack: that have resulted in the burning of more than 20 foreign trucks. The fishermen are protesting the French naval action March 7 against two Spanish trawlers that were fishing illegally in the Bay of Biscay. the Oval Office was devoted almost

The authorities said that more than 600 foreign trucks rolled across the border into Spain on Thursday in the first two hours of the borde opening in convoys of up to 15 rigs escorted by Basque police vans. The blockade began late Monday.

Poland Reported to Arrest Academics

WARSAW (UPI) - Police arrested about 25 academics and seize opposition literature during a raid on the Jagellonian University i Krakow, university sources said Thursday.

Diplomatic sources in Warsaw said the raid, which happened Marc.

12, was a sign that the Polish authorities were clamping down o opposition groups. One of those arrested was still detained Thursday, bu the others were released after 48 hours, the sources said.

The raid was one of the toughest crackdowns on academics since th imposition of martial law on Dec. 13, 1981, according to the source They said those arrested would be tried on charges of spreading illeg-information.

More Japanese Loans Seen for China

TOKYO (LAT) - Prime Minister Yasuhiro Nakasone of Japan : expected to pledge a seven-year package of \$2.1 billion in loans for seve Chinese economic development projects when he visits Beijing on Friday Japanese diplomats said Thursday.

The new aid, for railroads, harbors and power stations, follows a five ear package of \$1.3 billion in official aid that ends March 31. M Nakasone also is expected to announce grants of \$26.7 million for telecommunications training center and a meat-processing research inst

The diplomats said the new credits were expected to help increase two way trade, which last year exceeded \$10 billion, more than twice the \$4. billion level of U.S.-China trade. They added that the credits reaffin-Japan's long-term political commitment to assisting Chinese develor

TECHNOLOGY IBM's 'Open Architecture'

For PC Has Mixed Blessings

By DAVID E. SANGER

New York Times Service lmost nothing about the innards of an International Busi-ness Machines Corp. Personal Computer is secret, and that says almost everything, many believe, about the machine's success.

By designing an "open architecture" system, made largely with off-the-shelf parts, the company enabled thousands of innovators to build small fortunes by writing programs for the computer, or making peripheral equipment that enhanced its powers.

No one benefited from that strategy more than IBM itself.
Software sells computers, and more software — everything from financial spreadsheets to custom-designed programs - is available for the PC than any other microcomputer.

"Open architecture has been a tremendous boon to IBM." said Steven Ballmer, vice president of marketing for Microsoft Corp., the privately held Bellevue, Washington, company that designed the Personal Computer's op-

erating system. But the open system has also had its disadvantages. And now there are hints — a small flurry of IBM announcements and a lot of industry speculation about fu-ture products — that the days of the open IBM system may

The open architecture system means IBM is not in full control of its computer's destiny.

Despite denials from the company, "there is every indication that IBM wants to regain control," said Michael Murphy, coeditor of the California Technology Stock Letter.

Indeed, for all its virtues, the open architecture system means IBM is not in full control of its computer's destiny. Because independent software makers do not need to rely on IBM for technical help in designing their products, they can price their programs at will — often raising the overall cost of running a Personal Computer much higher than the computer giant would

Moreover, open architecture has also made it easy for dozens of manufacturers to turn out IBM-compatible computers. Should the IBM standard become immutable, Mr. Murphy and others say, it would likely benefit Japanese manufacturers, who would like nothing better than to aim their low-cost manufacturing technology at a sitting target.

All of this has been taken into account by IBM watchers, who scrutinize the company's moves with the care of a Kremlinologist reviewing the May Day linear atop the Lenin Mansoleum. And many of them expect that the next generation of IBM Personal · Computers will be built around a "proprietary" microprocessor and perhaps even a new operating system.

F or its part, IBM dismisses the speculation. "Open architecture has been responsible for tens of thousands of new products that are providing excellent value for users," the company said in a statement Wednesday. "We believe open architecture in this area is crucial to the discovery of new uses of personal

Most analysts remain unconvinced, saying that the first truly "proprietary" personal computer may be one expected later this year, capable of high-resolution graphics and displaying "windows" at high speed. Windows allow users to work on several documents at once. The high end of the line is also expected to allow multiple users, each at his own terminal, to share the power of the computer's microprocessor - much as computer users tap into larger minicomputers and mainframes.

Most analysts expect that the new IBM machine will be based on the Intel 80286, a sophisticated consin of the 8088 microprocessor in the Personal Computer. It is faster and more efficient than the 8088, consolidating many of the functions of other chips on the Personal Computer's circuit board into one. If the computer also made use of another processor, the

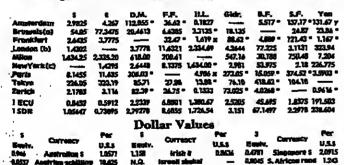

Motorola 6800, users could also run programs under the popular UNIX operating system, developed by Bell Laboratories and long favored by engineers and other specialists.

Analysts say their suspicions about IBM's moves are fueled by recent events. Lisa Morgenthaler, an analyst for Woodman, Kirkpatrick & Gilbreath in San Francisco, points to two specialized models of the PC announced last fall, both incorporating circuit boards with proprietary parts and software. IBM has kept the details of both under warms.

LA Informati the details of both under wraps.
On Wednesday, IBM offered a glimpse of its own prototype windowing package, in a program for brokers designed with Merrill Lynch.

All Eyes Are on the Fed as U.S. Economy Surges

The Suspense Builds: Will It Tug the Reins?

By Peter T. Kilborn New York Times Service

WASHINGTON - On Tuesday, the government estimated that the economy is growing at an annual rate of 7.2 percent this quarter, far faster than even the administration says is healthy or wise. And one day earlier, the banks raised their prime interest rate for the first time since August.

With that, a lot of nervous attention - in the marketplace, in the White House, in Congress, in the treasuries of other countries and

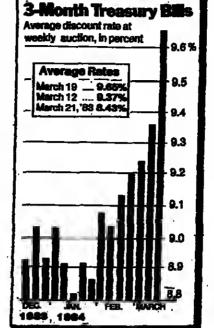

NEWS ANALYSIS

the counting rooms of industry - turned to the Federal Reserve Board, with fears rising that the central bank is causing or tolerating a new move toward higher borrowing costs.

With industrial activity now running at more than 80 percent of capacity and the economic expansion showing surprising vigor, the Fed is worried that new inflationary forces are building and need to be checked by a slower pace of business growth.

Some administration aides, including senior White house and Treasury officials, fear that higher interest rates before Election Day could damage the president's chances of reelection. And as these officials have done intermittently for three years, they seem dis-posed to blame the Fed for the prospect of igher rates.

So the Fed may be at one of those cross-roads where it could shove the economy in a new direction, as it did four and a half years ago, when a shift — to a severe curb on the availability of money - precipitated a deep

recession that produced a welcome decline in

Whether the Fed should tighten the reins again to cool down the economy is likely to be the subject of a good deal of election-year debate and perhaps acrimony.

Next Monday and Tuesday, the central bank's 12-member policy-making panel, the Federal Open Market Committee, will convene behind closed doors, as it does eight times a year, to consider the trends it sees in the economy and how to deal with them.

It is a more important meeting than most. The long battle in the administration and Congress over budget deficits has blunted two important tools of economic policy taxation and spending. Thus the focus on the Fed, which is left with the only other tool, its control over credit and - directly and indirectly - over interest rates, chiefly shortterm rates.

At a time when voters vote their pocketbooks, the Fed is beginning to feel the pressure from the White House and Congress.
"They are really m a trap with anything they try to do in this situation," said Robert V. Roosa, a partner of Brown Brothers Harriman in New York.

Paul A. Volcker, the Fed chairman, insists be ignores political influences, and his record seems to bear this out. But the pressures this year are as severe as they have ever been: If the Fed elects to curb the economy - to contain inflation — when Congress or the White House wants the Fed to spur recovery, the central bank could face another chorus of demands to restrict its independence.

If it relaxes its restraints on the growth of the money supply, and thus lets interest rates fall, stock prices might rise, in anticipation of another year of lusty industrial growth. But the bond market might see such relaxation as a recipe for more inflation and thus force up ong-term interest rates.

And the Fed must also be mindful of the developing world's debt. The payments that debtor countries must make on nearly all of the debt are linked to U.S. interest rates, Mr. Roosa said. As U.S. rates rise, so does the risk to both the earnings of U.S. creditor banks

and the health of the world economy.

Most economists doubt that the Fed had much to do directly with the rise in the prime rate and the chain of other rates -on federal funds, or overnight loans between banks; on

Durables Orders $\mathbf{Fell}\ \mathbf{1.2\%}\ \mathbf{in}\ \mathbf{U.S.}$ For February

WASHINGTON - Durable-

goods orders declined 1.2 percent in February, the first drop in seven months, the government reported

The Commerce Department said orders for durable goods — products expected to last three or more years — fell to \$99.7 billion following a sharp rise of 2.8 percent in January. The February decline was the first since a 2.9-percent drop in

Commerce Secretary Malcolm Baldrige said that, while new orders fell, the backlog of unfilled orders continued its yearlong rise.

"Inventories are still lean, so durables production promises to continue to contribute substantially to economie growth," be said. Even with the February decline, he said, new orders were up 3.5 percent from the average posted in the final three months of 1983.

The decline was led by an 8.8percent plunge in orders for steel and other primary metals, following a 17.8-percent rise in this category in January. The decline left orders at \$11.5 billion, still well above their low of \$7.1 billion in October 1982.

The department said activity in the metals industry had "been showing a strong upward trend" despite the fluctuations since the depths of the 1981-82 recession.

Nondefense capital goods saw an increase of 1.7 percent in February, identical to the January rise, This area reflects industry's plans to add equipment for future pro-duction and is considered a key are likely to challenge the arrangebarometer of future business activi-

Orders for machinery fell 3.8 percent, following a 0.2-percent rise in January. The decline reflected similar falls in the electrical and nonelectrical machinery segments. The new level of \$31.3 billion was still up from the low point reached a year earlier of \$24.7 bil-

Transportanon-equipment orders were up 4.1 percent following a 0.5-percent rise in January.

In the defense category, orders were up 5.1 percent following a decline of 25.1 percent in January. Orders for household durable goods fell 11.8 percent following a 5.3-percent increase the month be-

Shipments in February were up 0.1 percent to \$95.3 billion. The latest report reinforced indi-

cations from some segments of the economy that January's exceptionally strong progress was tempered by a slowdown the following

Baldrige Says Deficits Cause Too-High Dollar

WASHINGTON - U.S. Commerce Secretary Malcolm Baldrige said Thursday that high budget deficits were cansing the dollar to be overvalued — a view contrasting with re-cent statements by Treasury Secretary Donald T. Regan.

Mr. Baldrige told the U.S. Chamber of Commerce that he did not foresee a quick solution to the currency-exchange problem, which be said could be solved only by reducing the def-

Mr. Regan said recently that comparisons of exchange rates in past years between the dollar and other currencies did not indicate that the dollar was overvalued, But Mr. Baldrige said, "Whether or not you feel that other currencies are undervahued, I would agree that the dol-lar is too high."

He said negotiations were taking place between the Treasury and Japanese leaders to increase the international use of the yen so that it would strengthen against the dollar.

\$4 Billion in Latest Week United Press Intern NEW YORK - The narrowest

measure of the U.S. money supply, known as M-1, rose \$4 billion in the latest statistical week, the Federal Reserve Board said Thursday. Short-term borrowing also surged, signaling a possibility of further upward pressure on interest rates.

U.S. M-1 Up

"The money-supply rise had been fully discounted in the bond market, which already was down sharply on a host of other bad news," said William V. Sullivan Jr., senior vice president at Dean Witter Reynolds. "The consistent rise in the federal funds rate has put upward pressure on open-market yields, and if credit demand continues to surge we can expect further Mr. Sullivan noted that nonbank

commercial paper, short-term notes issued by large corporations, rose \$2.8 billion in the latest week, far above the normal seasonal Other data released by the Fed-

eral Reserve showed more than \$1 billion in borrowings at the Fed's discount window, "nearly double the figure of a few weeks ago," Mr. Sullivan said. This indicates that banks are being forced to make up needed reserves.

The \$4-billion increase in M-1 followed a \$1.4-billion drop the previous week and leaves the money supply within \$1 billion of the upper range of the Fed's growth Another negative for the credit

markets was the "poor reception" given the Treasury's \$8.25-billion two-year note auction Wednesday, Mr. Sullivan said. M-1, comprising cash, checking accounts and similar accounts —

money that is available for immediate spending - was a seasonally adjusted average of \$536.1 billion in the week that ended March 12, compared with \$532.1 billion the weeks, M-1 averaged a 6.5 percent

But West Germany's cartel of- ment.

By Bob Hagerty tional Herald Tribune

LONDON — Philip Morris Ine.
said Thursday that it had restructured its shareholding in Rothmans International PLC, the British tobacco company,

But the move failed to quell strong opposition from competitors and from West Germany's cartel office, and analysts continue to speculate that Philip Morris eventually will try to take over Rothmans. Such a move would create a dominant company in the Europe-an Community, where Rothmans is the largest seller of cigarettes and Philip Morris is No. 2 -The controversy stems from

Philip Morris's \$350-million purchase of an indirect stake in Rothmans in 1981. The U.S. tobacco, beer and soft-drinks giant acquired 50 percent of Rothmans Tobacco (Holdings) Ltd. from Rembrandt Group Ltd., which is controlled by Anton Rupert, a South African businessman. Rembrandt retained the other 50 percent. At the time of the transaction,

the holding company owned 44 percent of the equity and 50 percent of the voting rights in Roth-mans International. Thus, Philip Morris had an indirect stake in 22 percent of the equity. Under the planned restructuring

Philip Morris would sever the link to Rembrandt created by their joint ownership of the bolding company. Philip Morris would directly own 24.9 percent of the voting rights and 30.8 percent of the equity of Rothmans International. Rem-brandt would own 44 percent of the voting rights and 30.8 percent of the equity. The European Community

to the original arrangement as anticompetitive, has given its blessing to the new plan. The commission apparently reasoned that the new structure reduces the scope for coprevious week. In the latest 13 ordination between Rembrandt and Philip Morris. It said Rembrandt no longer needs Philip Mor-

U.S. Agencies' Rule On Money Brokers Set

By Nancy L Ross Washington Post Service

WASHINGTON - The Federal Deposit Insurance Corp. and the Federal Home Loan Bank Board, over objections from the administration and Congress, intend to issue a final regulation Monday that would virtually cut off brokered funds from banks and savings institutious, according to officials of the two agencies.

The regulation, effective Oct. 1, would limit insured funds to \$100,000 per money broker per institution. The agencies' chiefs insist that the measure is necessary because about half of all financial institutions that have failed in the kers. The brokers essentially help credit unions, find banks offering advantageous terms.

The proposal is basically the same one made several weeks ago. Although the agencies refused to say Wednesday if the resulting criticism had generated any changes, a source who has seen the draft rule said it will no longer require listing services to be covered as brokers. These services publish lists of institutions that offer the highest rates. ings on that legislation, there ap-At a hearing on deregulation be-pears to be no consensus.

fore the Senate Banking Commit-tee, the National Credit Union Administration's chairman, Edgar F. Callahan, said Wednesday that the change would not work because brokers would sell lists and banks would obtain deposits from the same sources without the middle-

The FDIC chairman, William Isaac, replied that his agency would propose a rule to stop credit unions with funds to deposit from "shop-ping for the highest rates from lonsy banks."

The comptroller of the currency, C. T. Conover, expressed disappointment that the FDIC and Federal Home Loan Bank Board chiefs past two years have received large deposits generated by money broof 15 percent of a bank's deposits institutional depositors, such as in brokered funds, or twice the bank's capital. The committee chairman, Jake

Garn, Republican of Utah, called the proposal overkill and said a compromise must be achieved. He added, however, that any such legislation would not be considered separately, only in the context of his omnibus Financial Services Competitive Equity Act.

In the next to last week of hear-

For the man with exceptional goals, a new dimension in banking services.

What makes Trade Develop-ment Bank exceptional? To start with, there is our policy of concentrating on things we do unusually well. For example, trade and export financing, foreign exchange and banknotes, money market transactions and precious metals.

Equally important, we are now even better placed to serve your needs, wherever you do business. Reason: We have recently joined American Express servative ratio of capital to International Banking Corpora-

tion, with its 64 offices in 36 countries, to bring you a whole new dimension in banking ser-While we move fast in serv-

ing our clients, we're distinctly traditionalist in our basic policies. At the heart of our business is the maintenance of a strong and diversified deposit base. Our portfolio of assets is also welldiversified, and it is a point of principle with us to keep a condeposits and a high degree of

liquidity-sensible strategies in these uncertain times. If TDB sounds like the sort

of bank you would entrust with your business, get in touch

TDB banks in Geneva. London, Paris, Luxembourg, Chiasso, Monte Carlo. Nassau, Panama City, Zurich.

TDB is a member of the American Express Group, which has assets of US\$ 38.6 billion and shareholders equity of US\$ 3.7 billion.

Democratic Primaries By Milton Coleman and Martin Schram Washington Post Service

Campaign Strategists

WASHINGTON - Advisers to Walter F. Mondale, Scnator Gary Hart and the Rev. Jesse L. Jackson are planning their strategies for the next phase of the Democratic presidential campaign as the contest for the nomination moves beyond its initial round of scattered, rapid-fire primaries to a marathon of weekly

One-third of the convention's 3,933 delegates have been selected, but neither Mr. Mondale nor Mr. Hart could clearly claim the mantle of front-runner, even though Mr. Mondale had 640 delegates to Mr.

Hart's 358 after man remass from the Illinois primary Tuesday.

Campaign strategists for the three candidates said that no one three candidates said that no one may have the 1,967 delegate votes needed to nominate at the end of the last primary day, June 5. There are five presidential primaries and cancuses that day, including California's important primary.

That would increase the likelihood that the selection would be made on the floor of the convention in San Francisco in mid-July, because by party rules no delegate is legally bound to the candidate of

Most major contests are well spaced between now and the campaign's final Tuesday. They include the New York primary April 3, Permsylvania primary April 10, the Missouri caucuses April 18, the tration,

Texas cancuses May 5 and the Ohio primary May 8.

"We want to get the campaign away from the ephemeral notion of momentum and back to the issues of the campaign," said Oliver Henkel, Mr. Hart's campaign manager.
"There will be a lot of scrambling between June 6 and the conven-

Mr. Mondale, too, plans to be issue-oriented, his campaign chairman, James A. Johnson, said. But he noted the political advantage of Mr. Mondale's lead of nearly 300

delegates.
Mr. Jackson is counting not only issues and delegate votes, of which he has fewer than 80 now, but also the number of popular votes he

There's no question now that he commands a critical part of the electorate," said his deputy campaign manager, Preston Love. And that part is large enough and important enough that if he does not get the nomination, the nominee will have to deal with him." All three candidates showed signs Wednesday of the wear and tear of the early political sprints. Mr. Jackson and Mr. Hart both

spent the better part of the day resting and meeting with advisers.

Mr. Mondale, who concentrated his spending on the first phase of the campaign, headed west to New Mexico and California for fundraising events.

Even though he said he was "pooped," Mr. Mondale stepped up attacks on the Reagan adminis-

Hinckley Letter to Reagan Tells Of 'Great Remorse' Over Shooting

WASHINGTON — John W. Hinckley Jr., who attempted to assassinate President Ronald Reagan in 1981, says be now has "great remorse for the pain I inflicted on so many people" in "a crazy

"I am very sorry for the shooting," Mr. Hinckley said in an open letter to Mr. Reagan, which he sent to The Washington Post. "I thank God no one died, but I still live with the fact that James Brady is partially paralyzed and his life is less than what it should be. The emotional pain that I caused is also tremendous, and I know your wife

and family suffered greatly.

"I can only hope you and your family will forgive me for my past madness. I pray for the victims of the shooting every night, and God has been answering my prayers."

Mr. Hinckley, who has been confined to St. Elizabeths Hospital in Washington since he was found not guilty in the assassination attempt by reason of insanity, asked that the letter be published on the March 30 anniversary of the shooting.

Besides Mr. Reagan, three other persons were wounded: Mr.

Brady, the president's press secretary, a Secret Service agent and a Washington policeman. Mr. Brady is still undergoing therapy for a disabling head wound.

Walter F. Mondale displays a T-shirt given to him on his arrival in Los Angeles for fund-raising events in California.

tion." This was a reference to allogations against Edwin Meese 3d, the president's nominee for attorney general, that led Mr. Meese to call Thursday for an investigation

■ Candidates Spar Over Israel

Mr. Mondale accused Mr. Hart on Thursday of "a blatant political shift" as Mr. Hart apologized for a letter that differed from his state-ments on moving the U.S. Embassy in Israel, The Associated Press reported from Los Angeles.

Both candidates are seeking to dvance their position among Jewish voters, who have accounted for about a third of the Democratic primary turnout in New York City in recent primaries.

Mr. Hart, speaking in New York City, was asked to explain a letter sent out by his Senate office that suggested the U.S. Embassy in Israel be moved to Jerusalem only as part of overall effort to negotiate a Middle East peace treaty.

Mr. Hart said that if elected president, he would move the embassy without preconditions. As for the letter, he said, "I apologize for that ambiguity. It is unfortunate, I assume responsibility for it. But the letter does not reflect my position today or my position a year ago, or for that matter six

At a news conference in Los An-, movement. It's not fast enough."

"By the time we get past the nomination, I predict the Democratic Party will be more unified than ever before," Mr. Mondale said m Albuquerque, New Mexico.
"The main unifying factor will be the sleaze factor in this administration." This was a reference at the said of America indicating and the said of the said of America indicating and the said of the s

other point of view.

In the letter, Mr. Mondale said,
Mr. Hart said the United States should not take sides in the matter unless agreement on the matter was reached by all sides. Mr. Mondale said he interpreted this to mean the various Arab factions in the Middle East, and "the chances of that are as great as the sun coming up from

Jackson Cites Race Factor Gerald M. Boyd of The New York
Times reported from Richmond, Vir-

Mr. Jackson, asked at a news conference Wednesday to explain the failure of most whites to support his presidential bid, said, Whites have developed over their history a lack of regard for the intelligence and hard work of black people."

Mr. Jackson's response represented one of the few times in recent weeks that he has tried to explain his lack of voting success among whites, particularly liberals, peace advocates and others who would seem to endorse his views.

Mr. Jackson, speaking on the campus of Virginia Union University, said, "It remains a moral challenge to white leadership to make judgments based on character and not based upon race. I've seen slow

Salvadoran Campaign Closes Quietly particularly from the capital, where they have adopted in the cam-

By Richard J. Meislin New York Times Service

SAN SALVADOR - El Salvador's presidential campaign, which drew to a close Wednesday, was marked by less violence than the campaign two years ago.

No one is willing to predict whether the atmosphere of relative tranquillity will last through Sunday's voting. For the moment, however, what is not happening in San Salvador is more noticeable than

"One of the most remarkable things about this campaign is how little violence there has been," said former President Jose Napoleón Duarte, the presidential candidate of the Christian Democratic Party.

None of the major candidates -Mr. Duarte, Roberto d'Aubuissoo of the far-right Republican National Alliance and Francisco José Guerrero of the National Conciliatioo Party - had major public ap-pearances Wednesday, the last campaigning day before a three-day hiatus required by law.

To be sure, some violence persists. Three members of the Constituent Assembly were killed by unidentified gunmen during the campaign. Residents are still shaken from their sleep by an occasional bomb or the rattle of gunfire in the night. Power outages are not uncommon in the capital.

The Salvadoran military continues to battle the guerrillas in the countryside. But, although there have been brief outbreaks of new fighting in recent days in Suchitoto. San Miguel and San Vicente, there has been oo major increase in activity since the guerrillas ended a major offensive in January.

But almost entirely missing

U.S. Armed Forces

The Associated Press

NORFOLK, Virginia — More than 30,000 military personnel from the U.S. armed forces will participate oext month in one of the largest training exercises ever held in the Caribbean, the Atlantic Fleet announced Thursday.

The exercise, called Ocean Venture '84, will be conducted April 20 through May 6 in the Caribbean, the Gulf of Mexico, the Straits of Florida and the Atlantic Ocean.

Fleet officials said units taking part in the exercise include the aircraft carrier America and its battle the country. The two are considgroup, the army's 82d Airborne Di- ered the leaders in the election. vision, the 26th Marine Amphibious Unit, an amphibious task force, destroyers, submarines and minesweepers and air force and Coast Guard units. The exercise is to protect sea lanes in the region.

about one-third of the vote is expected be cast - is the atmosphere of tension and intimidation that

preceded the 1982 vote. Before that election, the guerrillas battling the government vowed to try to disrupt the voting through military action. Although a major disruption never came, the threat bad the country in a state of anxi-

This time, the political-military council that nominally leads the guerrilla effort said in advance that although they thought the elections were a farce, they would not try to make them a "direct target" of miltary action.

The exiled opposition called for a national conference conducted by an appointed "government of representatives of all political fac-tions and sectors of Salvadoran society except that of Mr. d'Aubuis-

While two of the three top candidates, Mr. Duarte and Mr. Guerrero, are willing to hold talks with the guerrillas, no political force in the country is willing to forgo the election to do so.

A major opposition military leader, Joaquin Villalobos, leader of the People's Revolutionary Army, vowed last weekend that the guerrillas would "deepen" the war before, during and after" the election. But subsequent statements on the rebel radio station, Radio Venceremos, have only warned government officials and businessmen that they will face reprisals if they press subordinates to vote.

About the only direct rebel actioo taken to thwart the election has been the seizure of national identity cards in some villages. Under the election law, those without the cards will be unable to vote. It is in sharp contrast to the campaign of fear mounted by the guerrillas

two years ago. The beavily armed security forces who regularly patrolled the streets of the capital in 1982 are seldom seen, Residents say the patrols are less frequent, or at least less visible, than they have been in

■ Magaña's Views

Robert J. McCartney of The Washington Post reported: President Alvaro Magaña of El Salvador, in an interview Wednesday, disputed suggestions that the election of either Mr. Duarte or Mr. d'Aubuisson would polarize

Mr. Magaña, who is to leave office June 1 after more than two years as provisional president, said,
"If either one of them wins, it seems to me that their government demonstrate U.S. capabilities to will not be 100 percent identified for the flights to the United States, with the polarized positions that Africa and the Gulf.

One of these gentlemen will face a large fraction of the assembly against him," he said. "That's wby I am not worried it will be an extreme government." Later, he said that the armed forces also would exert a restraining influence. In the interview, Mr. Magaña

also made these points: • The United States is likely to continue to supply military and economic aid to El Salvador because Washington views the country as "fundamental" to U.S. security. He acknowledged, however,

death squads, would create "difficulties" in obtaining congressional

approval of new aid. The armed forces as a whole appear unlikely to stage a coup "at least for a whole year," assuming that the new president does not try to wrench the country in one direc-

tion or another politically.

• El Salvador probably would not decide until after the election whether to participate in joint military exercises with U.S., Honduran and possibly Guatemalan troops in

Another Half a Point

The banks' prime interest rates reflect, at least roughly, the rates that the banks have to offer to attract deposits. Those rates are set in the great continuous auction of the money markets, and to the past year they have been rising. The U.S. government is having to pay higher interest to attract the money necessary to finance its budget deficit, and private business has to bid against it to finance its own expansion. The prime rate, 10.5 percent a year ago, went to 11 perceot to August. Now it has risen again, to 11.5 percent.

At the same time, the Commerce Department published America's international accounts for 1983. There is a link between the movement of the domestic interest rates and financial flows with the rest of the world. The deficit in the current account set a new record, increasing steadily and rapidly throughout the year. The current account is a broad and illuminating measure of the country's international financial position; it includes merchandise imports and exports and also net earnings on services and investments abroad. The current account deficit is an important number because it represents the extent to which the rest of the world is financing the U.S. economy by accepting IOUs in dollars.

The government's budget deficit, by forcing up interest rates, has induced foreigners to lend to America. But what happens if those foreigners decide, as a good many bave decided to recent months, to pull out their money and send it somewhere else? Then the dollar falls on the foreign exchange markets, and interest rates rise, as government and business in America compete still more aggressively for a diminishing supply of credit. Both effects—the declining dollar and the rising rates—have been clearly visible since mid-January.

American politics is poorly equipped to deal with the international effects of its internal mistakes. The prevailing ideas about economic policy were formed in the country in the 1950s and '60s, a period of fixed exchange rates and massive American domination of world markets. There is not much in American experience to prepare either politicians or voters for the kind of instability that international deficits on the present scale, and swings in the value of the currency, can generate. Relying on foreigners to finance U.S. public spending has been convenient in the very short run, but it has created a degree of economie vulnerability that is now becoming apparent.

- THE WASHINGTON POST.

Toying With Jerusalem

And now that unguided missile called American diplomacy is aimed at Jerusalem. For reasons that have more to do with politics in the United States than the Middle East, Congress clamors to have the American Embassy in Israel moved from Tel Aviv to Jerusalem. For reasons that sound cowardly but are rooted in prudence, the Reagan administration clumsily pleads for the agitation to stop.

The sponsors of the bill note that Jerusalem is the only capital denied full respect by America. They call it craven appeasement of Arab opinion. Mr. Reagan replies that his diplomats treat Jerusalem as Israel's capital but that actually moving there would ignite an anti-American explosion in the Moslem world. What Congress ignores is the adage: If it ain't broke, don't fix it. What Mr. Reagan ignores is his capacity to end this needless controversy by dealing firmly but justly with Israel.

Jerusalem is a city of storied beauty, boly to three religions. It has been reunited and brilliantly administered by Israel since 1967, when Jordan lost the eastern half in a war it should never have joined. The city's 300,000 Jews and 100,000 Arabs, although to no sense totegrated, have prospered and forged relationships that diplomats cannot formally acknowledge.

West Jerusalem has been Israel's capital for 36 years. The walled Old City with its Chrisoan, Jewish and Moslem shrines bas been safe and open to all worshippers for 17 years. East Jerusalem, although recently made nearly half-Jewish, remains a vibrant Arab center linked

commercially, culturally and politically with Jordan. Given the passions that attach to Jerusalem's every rock, the city's daily life is a remarkable testament to accommodation.

If ever a true Arab-Israeli peace is written, Jerusalem would be the most difficult paragraph. Diplomats tried writing one at Camp David and almost wrecked the talks. They would not even agree to record their disagreements. Israel claims sovereignty over all Jerusalem. Egypt claims that at least East Jerusalem is sovereign Arab soil. America thinks that until the city's future is negotiated, East Jerusalem is "occupied" territory.

All Israelis are determined to hold all Jerusalem forever. But many want the issue to lie dormant, to keep the city peaceful until other disputes are resolved. And at least between election years, American leaders have been content to let the matter lie, so as to preserve bope for Arab-Israeli negotiations.

In that spirit, President Reagan's quiet message to Tel Aviv - or rather, Jerusalem should be easy to compose: I'll move the embassy tomorrow, if you insist, but to your "juridical" capital of "West Jerusalem." If I move, I shall also have to proclaim at every turn that East Jerusalem is "occupied" and that its borders and status are unsettled.

It is hard to believe that Israel wants to revive such conflict with America. So why are politicians playing with this flame? If there is a grievance, it is for Israel to press, not Congress.

-THE NEW YORK TIMES.

Other Opinion

Europe and the Third World

[African, Caribbean and Pacific countries hope the European Community will surmount its summit failure.] They would like to believe that because a united Community is easier to negotiate with than a dismembered Europe. A European common market would also enable its industries to pick up faster from the throes of inflation. This would stimulate demand for imports from ACP countries.

ACP countries believe, too, that an economically strong Europe would address itself more seriously to the deteriorating terms of trade. A strong Europe may also find it easier to give investments the importance they deserve. Only investments - joint ones between private individuals and institutions, if necessary - can give ACP countries the economic dose they require to stay afloat.

- The Daily Nation (Nairobi).

Mitterrand Visits America

François Mitterrand is a socialist who disagrees with much that the United States does in the world, but be is also a patriot whose common sense tells him that, in the things that matter, France and America stand together,

His visit should be viewed in that light.

During most of the years since World War II there has been a certain anti-Americanism in France. The late Charles de Gaulle tended to define French independence in terms of separateness from American policy. One would have thought that these differences would have been especially pronounced in an era in which France was led by Mr. Mitterrand, a convinced socialist, and the United States was led

by Ronald Reagan, an ideological conserva-

tive. Things haven't worked out that way.
France, to be sure, still has a view of Third World problems that is different from that of the United States. Also, the French, along with other Europeans, are very upset over the Reagan economic policies that translate loto high toterest rates and an overvalued dollar. But Mr. Mitterrand has kept his eyes on something more important — the ability of the West to

cope with Soviet bullying.
The French leader has used his considerable political weight to warn West Germans not to fall victim to the temptation to play Washingtoo against Moscow for reasons of domestic German politics. [He] has been the staunchest supporter of the NATO plan for deploying U.S.-made missiles as an offset against the Soviet SS-20 missiles that are already in place.

In truth, the evolution of French attitudes reflects far more than a change in leadership. It also involves a dramatie shift in the view of Freneb intellectuals, who are no longer inclined to give the Soviet Union the benefit of the doubt. At a time when the West German political situation is in flux, Americans have a special reason to appreciate Mr. Mitterrand's France as a solid anchor of the West.

Some Lebanese Aren't Ready

National reconciliadon in Lebanon failed because not enough people are yet ready for it: Too many believe that if they hang on longer, almost certainly with a few more rounds of bloodletting, they will get more than was on offer in the artificial environs of Lausanne.

- The Guardian (London).

FROM OUR MARCH 23 PAGES, 75 AND 50 YEARS AGO

1909: Carrie Nation Assails English NEW YORK - The Baltic arrived [on March 21] with Mrs. Carrie Nation in the second cabin, whose other occupants had a tempestu-ous voyage. Stewards said that Mrs. Nation snatched cigars and cigarettes from the mouths of passengers and made the voyage still more miserable by denouncing them when they took alcoholic drinks. She escaped being put in irons. Mrs. Nation harangued reporters at the dock on observations she made in England. She said: "Nobody in England has an original thought. I never saw so many cowards. Even the clergymen are cowards. It is because they don't want to lose their meal tickets. I never saw so many men and women drunkards as to London. Whatever political differences there may be between the Liberals, the Tories and the Laborites, they are all for rum,"

1934: Fire Devastates Japanese Port HAKODATE, Japan - At least 1,000 persons have lost their lives, while 120,000 have been rendered homeless by a fire which laid waste to two-thirds of Hakodate [on March 21] and is still smoldering in the ruins of the city. Another 2,000 persons are still unaccounted for and it is feared that the final death toll may be double the present official estimate. Thou-sands fied to the hills above the town where they sought such shelter as could be found from the bitter cold. The fire was caused by the toppling over of a chimney shaft of the Hakodate public baths, the resulting blaze being swept through the city by a strong wind. While it is still impossible to ascertain the extent of the damage, it is estimated at \$8,000,000. Hakodate is a seaport and industrial centre on the Island of Hokkaido, northern Japan.

Khomeini May Be on the Verge of a Sweep

WASHINGTON — President Reagan, his eyes V fixed on the Kremlin, had better take a good look at Iran. Ayatollah Khomeini may be on the point of precipitating one of the biggest geopoliti-

cal upheavals since World War IL Reports from the front indicate that Iran's forces may be nearing a breakthrough. According to military analysts, Iraq, heavily outnumbered, is being exhausted by Iran's relentless buman-wave offensives. Apparent use of poison gas may be a sign of Iraqi desperation. A forthcoming Iranian offensive could sweep the Iraqis away.

President Reagan's recent public statements indicate a growing awareness of the danger of an Iranian victory. But the concerns he has expressed are for the Gulf as a waterway. Io fact the threat is more serious than that.

U.S. strategic thinking has for so long been oriented toward the Mediterranean edge of the Fertile Crescent that it has scarcely taken account of the resile that are the scarcely taken account. of the perils that an underarmed but highly motivated army can present on the eastern flank.

Ayatollah Khomeini, apart from his religious zealotry, stands for an Iran which for centuries has challenged the Arab world. If he succeeds in occu-pying Baghdad, or in bringing down Iraq's Presi-dent Saddam Hussein, it would be naive to believe that his appetite would be satisfied.

Mr. Hussein's regime offends the ayatollah, who, during years of exile to Iraq, worked tirelessly

By Milton Viorst

to subvert its secular, socialist-oriented tenets. Mr. Hussein, himself a tyrant, started the war. His reason, he says, was to save Iraq from Ayatollah Khomeim's attempt to set up the kind of radical theocracy he established in Iran.

The ayatollah's target is not just Iraq, however. No Arab regime is Persian enough or pure enough to meet his exalted standards.

If Iran's army vanquishes Iraq, it would almost surely turn south to swallow up the pro-Western oil states — Kuwait, Qatar, Bahrain — on the shore of the Gulf. Sandi Arabia is unlikely to organize itself to resist. It is not farfetched to imagine Iran acquiring control of all the oil on the Gair's periphery. Would the ayatollah stop there? Islamie fundamentalists who are already installed in every Arab state would serve as a fifth column, preparing the way for his armed forces.

Hafez al-Assad's Syria, currently riding high as master of Lebanon, recently fought a nasty little civil war against fundamentalists at home. Although he has taken Iran's side in the current war, Mr. Assad subscribes to the same Baathist tenets as Iraq. Most Arabs would bet their worry beads that Ayatollah Khomeini io victory would not show Mr. Assad the slightest pity. The ayatollah already has a beachhead among

the Shiites in Lebanon. The recent victory of three

Islamic fundamentalists in elections in Jordan demonstrates that even there he has support. Israel is almost surely his ultimate target. If S ROUNDUB

after Ayatollah Khomeini took over, supplying arms and ignoring vicious anti-Israeli slogans.
Quite possibly the Khomeini regime would not have survived the early stage of the war, which Iraq dominated, without Israeli weapons. There is evidence, even now, that Israel is buying Iranian oil and shipping military supplies in return.

Mr. Reagan's record in Lebanon, and Israel's,

show how vulnerable both are to surprises. They could wake up one morning to find Ayatollal Khomeini installed on the Jordan River.

Mr. Reagan remains obsessed with the Russians, a relatively feeble force in the Middle East, and the Israelis with the Arabs, who have not for years had the capacity to do them serious damage. But the security situation in the Middle East is changing ominously. Staying faithful to the old strategic cliches could prove disastrous.

The writer, a specialist in Middle East affairs. contributed this article to The Washington Post.

Where 'to Run for Office Is To Run for the Cemetery'

By Guillermo Ungo

The writer is president of the Democratic Revolutionary Front of El Salvador and a vice president of the Socialist Interna

D ANAMA CITY — The presi-I dential election in El Salvador on Sunday will not be free or democratic. Nor will it contribute to a resolution of the main problems of the country — war, military dictatorship, widespread violations of buman rights, economic and political crises and foreign intervention.

The election takes place in a set-

ting very different from that of a election. It is being held in the midst of a full-scale war that now spreads over most of the country. More than 45,000 people, almost 1 percent of the population, have been killed in the last four years by death squads and the armed forces. Hundreds of people are under ar-

rest or have disappeared.
All independent press and broad-casting has been destroyed by the army and the oligarchy. What is left of the press is controlled by the hard right and the armed forces. Free campaigns and political organizing are impossible in this atmosphere of repression, fear and death. For members of the opposition to run for office is to run for the cemetery. In this atmosphere, the opposition feels that an election is premature. We believe that peace, justice,

respect for buman rights and the foundations of a democratic system —the conditions for free and democratic elections — must come first. This is precisely what we want and propose. Thereafter, we would be ready for general elections. The approaching election, far

from improving the political situa-

tion, has instead already worsened it. Victory for any of the three candidates running for president could easily lead to a coup d'état. It could also lead to the formation of a weaker and less stable government than the present one, a government that would have less support and more contradictions, both nationally and internationally

The decision to bold this election was made by and for Washington. The outcome will prolong the war and make increased U.S. military aid necessary. It may be used to justify direct military intervention to save what will be called "a democratically elected government."

We in the opposition believe that there is a better way. On Feb. 9, in Mexico City, the Salvadoran opposition announced a detailed proposal for a broad-based provisional government that would lead to general elections within a relatively short time. We in the opposition are committed to elections through negotiations. We would bope in this way to bring about the first Salvadoran elections not abused by the oligarchy and the army. Only to this way can we belp Salvadorans to regain faith in the electoral process.

The options are clear: a military or a political solution, intervention or power-sharing. The best is a broad-based coalition government to achieve peace, lay the grounds for a democratic system and lead to free elections. Thus we bope to guarantee Salvadoran stability and security for the bemisphere.

'And I solemnly promise to punish those right-wing killers.'

We in the opposition are sharply aware of the economic and geopolitical realities we will face if we achieve a share of power. This, and our experience within the left in our coalition of armed and unarmed groups, has contributed to a maturing of the Salvadoran opposition. It bas shaped our ideology —our wish for a democratic and nonaligned revolution. We want a new relationship with the United States, a relationship based on mutual respect and cooperation. We believe that such ties are necessary and possible.

Yet so far Washington has been indifferent to our goal — hostile to real democracy and nonalignment. It cootinues to support dictator-ships, to manipulate and destroy democracies, to disrupt Latin

Americans' progress toward independence and nonalignment. It has shown that it is bostile to revolution in a small neighboring country no matter what the nature and ideology of that revolution.

This, of course, makes it all the more difficult — if not impossible - to achieve our bopes for a democratic and nonaligned revolution. Instead, the United States should be helping to create space for peace, democracy and nonalignment.

We to the Salvadoran opposition are facing our responsibilities. It is time for the Reagan administration and Congress to face theirs. Otherwise we may soon be caught up to a large and violent confrontation that ould all prefer to avoid.

The New York Times.

Mitterrand Deserves a Hearing From Americans

WASHINGTON — Americans owe a careful hearing to visiting President François Mitterrand of France, currently on a coast-to-coast

tour of the United States. The ritual bobnobbing with Washington's high and mighty was not supposed to produce more than the usual reaffirmations of friendship and shared principles, some elear definition of areas of agreement - and agreements to disagree on particulars. But his exposition of the unique French viewpoint is a bealthy antidote at a time when you can hardly open a journal of opinion without encountering a learned lament over the alarming state of the Atlantic alliance. Henry Kissinger, for one, is proposing major surgery: a far larger European conventional military contribution and a dramatic rearrangement of American and European roles to deal with NATO controversies that he says are "both unprece-dented and unsettling."

Returning from a conference of Americans, Europeans and a few So-viets in West Berlin, Arthur Schlesinger Jr. reported dire findings.
No less than other Europeans, the French resent a lack of adequate U.S.

consultation. They, too, perceive a tendency of the Reagan administration to turn every Third World conflict into an East-West cockpit. They also see an overbearing, too-demanding U.S. insistence that Enrope should be a fee looked to the Alliance der a far larger share of the Alliance By Philip Geyelin

aging European economies.

The French prize their own independent nuclear force. Mr. Mitterrand, no less than Charles de Gaulle, insists on an arm's-length relation-ship with NATO: French forces available but not integrated into the NATO command structure, with

France sitting in on NATO councils. While expressing an understanding of the U.S. preoccupation with its Soviet superpower adversary, Mr. Mitterrand draws a practical distinction. "We French live on the same continent as the Russians and harbor no hostility toward them ... Given the confidence we have in ourselves, none of us should hesitate to enter into dialogue with the Soviet Union We have always favored main-

taining trade relations."

And yet, for all that, France is uniquely positioned among all the NATO allies to be part of the solution. Mr. Mitterrand's ano-communist credentials are beyond question. So is his dedication to the Atlantic alliance, if not to all its workings. At a time when Europe is not exactly blessed with towering leaders of the stature of an Adenauer, a Churchill. or a de Gaulle - or with the vision of a Jean Monnet, who labored a lifetime for a united Europe - Mr. Mitterrand is out front in an effort to get

defense budget at a time when U.S. the West Europeans to do more to economic policies are severely daminprove their own defenses. improve their own defenses. Mr. Mitterrand is moving carefully, but with a sense of urgency that is born of two anxieties.

One is an awareness that the Americans will probably not be prepared to continue a costly defense effort in Europe unless the Europeans are willing to do more on their own.

The other is West Germany, where "neutralist" or "naoonalist" political pressures could cause West Germans to slip their moorings to the Western alliance in pursuit of some closer reconnection with East Germany.

Mr. Mitterrand would do nothing to undermine NATO. Nor would he threaten the U.S.-European connection in any way that might undercut the effectiveness of U.S. nuclear deterrence. But he is moving to expand French-German military cooperation. The two countries have agreed to join in the production of a German-French combat helicopter. Mr. Mitterrand has revived arrangements for systematic defense consultation which have languished since they were written into a French-German friendship treaty in 1963.

The French are replacing their Plu-ton tactical nuclear missiles with the longer-range Hades. The significance of this is that Hades missiles would be targeted on East Germany. They, would be designed to deter an attack

on France before the attackers had reached West Germany, the Pluton's shorter range would have made West Germany the nuclear battlefield.

Union, a moribund organization set up after World War II to keep an eye on West German rearmament. Now the idea is to use the WEU as an instrument for promoting "Europeanization" of Europe's defenses, including cooperative production of new weapons and the sharing of weapons technology in an effort to give Western Europe a greater measure of technological independence from the United States.

None of this guarantees that the Europeans will be ready any time soon to take on a substantially larger share of the NATO burden. The The less their nee for Soviet arms, the less their nee for Soviet arms, the less their countries will rely on ties to Moscow.

The next critical step is a Namit. defense ministers are still going to have to deal with the finance ministers," says one knowledgeable European. The crisis in the European Community does not augur well for European collaboration on anything. But that makes Mr. Mitterrand's various initiatives all the more valu-

able, if only in relative terms. He is not only worrying about some of the of the day when southern Africa car same things that worry U.S. policy-makers, he is doing something about regions whose conflicts could prothem. In the long run, that may prove far more important to U.S. interests than France's distaste for U.S. policy in, say, El Salvador.

people, thus carning by political an social example the regional primac they crave and have won economica. The French are taking the lead in a ly and militarily. Already, blacks an plan to revive the Western European opposition whites can argue that it i basie contradiction to deal on a equal basis with black African leac ers and enforce racism at home. Every move toward reducing cor flict in the region and racism in Sout Africa is in the global interest of th United States. It probably does no matter whether Mozambique an Angola see negotiations as an a~ tempt to preserve their beleaguere

revolutionary regimes or as a tur toward the West. The less their nec for Soviet arms, the less than tries will rely on ties to Moscow.

The next critical step is a Namibian settlement, which will surely the company withdrawal from Ange. bring Cuban withdrawal from Ang.

la. America can afford to break the chicken-and-egg impasse it helpe create by its demand that the Cuban promise to leave first. With that excuse removed, the press of history ca. move Pretoria toward wider peace.
It seems wildly optimistic

> voke superpower confrontation. Buthe possibility may be coming. The United States should seize the opportunity. It could break the deadlock. The New York Times.

LETTERS TO THE EDITOR

Dialogue at UNESCO

As chairman of the so-called Infor-mation Group at UNESCO — an informal consultative group which meets regularly to share information and is made up of 24 states which are also members of the OECD - I wish to comment briefly on your March 16 report entitled "24 Nations Ask Changes at UNESCO." As the article is open to a number

of interpretations, I would like to explain that a working document has been prepared within the group which is an analysis of UNESCO's long-standing problems and contains proposals for solving them. It meets with the agreement of a large majority of the states making up the group, and has been made available to other groups of member states at UNES-CO and to the director-general in order to find common ground and provide a basis for discussion and dialogue on how matters at UNES-

CO can be improved.

developed among the majority of member states. The sharing of this document with other member states and with the director-general is the first step in this process.

begin a frank and constructive dia-logue with all concerned. I find your omission difficult to logue with all concerned.

It is boped that by taking advantage of the perceptible mood for renewal in all quarters at UNESCO,

If find your omission dirricult with the light of the quite proper prominence that you gave to the March 14 murder of the quite proper prominence that you gave to the March 14 murder progress on a number of issues can begin with the spring session of

UNESCO's executive board.

A.J. PHRYDAS, Ambassador of Greece.

UNESCO, Paris. FitzGerald in America

I bave been an avid reader of the International Herald Tribune since it became available in Northern Ireland two weeks ago. Your coverage of the American primaries is unrivaled in the United Kingdom or Ireland and I commend you for it. However, I was Efforts to ebange UNESCO will be most disappointed and surprised to

Sandino: 'Just a Bandit'

Regarding the opinion column "Don Augusto Césur Haunts the Colossus" (Feb. 23) by Peter Kornbluh: If the writer will continue research-

ing, he may find that to the early 1920s the Nicaraguan government was heavily in debt to Britain, which had no hope of collecting and threatened to send troops. That could have led to colonization, but then the successful to the extent that a cooper-ative effort and united will can be see not a mention of Irish Prime Min-tunited States pulled out its Monroe isler Garret FitzGerald's address to a Doctrine and put a stop to it.

Britain was adamant, so an agreement was made whereby a U.S. Marine colonel was placed in charge of customs collections in Managua and a small detachment of marines was to train the Guardia Nacional This ensured the British of repayment of the debt from a stabilized nation whose strength could deter revolutions.

In this same time span, many bandit gangs, soldiers of fortune and other adventurers roamed the hills of Central America, raiding village banks and wealthy businessmen. Don Augusto César Sandino and his so-called revolutionaries were just another bandit gang of the times. To keep them from destabilizing the country, the Guardia Nacional, with U.S. marines participating, set out to capture Sandino. He was finally enticed to a meeting and killed, thus ending the activities of his gang. The marines were withdrawn after his death, but the post of chief of customs continued to be occupied by a marine colonel until the debt was

finally paid off in the 1970s. Nicaraguans were not enemies of the United States oor were they treat-

ed as such: the country was neithe conquered nor occupied. Relation between the two governments we excellent until the current group too over and made Nicaragua into a advance base for communism.

HONG KONG - General Electric Co. PLC of Britain and France's Framatome SA are likely to be awarded major contracts for a planned nuclear-power project in China's Guangdong province by July, industry sources here said Thursday.

GEC recently submitted a bid to supply two 950-1,000-megawatt turbine generators and related equipment, while Framatome tendered in February for the construc-tion of two nuclear reactors, the

Both bids were backed by gov- tions, BASF said. It added that ernment-backed financing pack- capital investments in 1983 were ages for about \$1 billion each but lower than a year earlier because the sources were unable to estimate the value of the tenders.

worldwide group pre-tax profit for better than had been expected. It 1983 soared 66 percent on an 8.1- added that strong orders during the first months of the current year

BASF did not comment on the dividend it would pay for 1983. The 1982 payout was reduced to 5 DM from the 7 DM it paid a year earlier. But Hans Albers, the chairman of the management board, said last antumn that, because of the pros-pect of improved 1983 profit, there was no reason for the dividend not to be changed.

A company spokesman said Thursday that the supervisory board would meet April 25 to set the dividend.

Despite the 66-percent increase in pre-tax earnings, the company said that losses in currency transactions had hurt results.

The company said the rise in 1983 sales was because of higher volume, with particularly high increases in West Germany, North America and Asia.
Sales fell in some European na-

Hambros Bank To Buy Stake In Brokerage

International Herald Tribune LONDON - Hambros Bank, one of Britain's biggest merchant banks, said Thursday that it had agreed in principle to buy a 29.9-percent stake in the Loodoo stockbrokerage of Strauss Tumbuil & Co.

The planned alliance is the latest in a series announced in recent months as British banks and securities houses prepare for government-encouraged deregulation of the stock market. Hambros also said that it

would join with Societe Generale, the French bank, and Strauss Turnbull to set up an international share-dealing company with an initial capital of about £10 million (\$14.2 million). The move will not affect Société Générale Stranss Turnbull Ltd., a London-based Enrobond trading house set up by the French bank and the British broker in 1980, Hambros said.

Rupert Hambro, chairman of Hambros, said the bank was attracted by Strauss Turnbull's expertise in international securities trading.

The companies declined to disclose the price for the stake.

Disney Attempting to Triple As the U.S. Economy Surges Credit Line to \$1.3 Billion

LOS ANGELES — Walt Disney Productions, rumored to be a takeover target, said Thursday that it was trying to triple its \$400-million credit line to \$1.3 billion.

Michael L. Bagnall, Disney's chief financial officer, said that Disney was negotiating with a group of banks. Disney's current credit line is with Bank of America. Mr. Bagnall's statement made no

mention of whether the negotiations were part of a takeover de-fense, as the Los Angeles Times suggested in a report Thursday. He said the additional credit availability would be for "general corporate

Edwin Okun, a Disney vice pre ident and spokesman, said the company had no comment beyond its statement as to the reasons for the negotiations. Mr. Okun also reiterated the company's earlier statements that it did not know of any potential suitor. Rumors about a takeover, which

have helped lift Disney's stock sharply in recent days, have fo-cused on Roy E. Disney, son of one of the company's co-founders, Roy

for the resignation. At the start of 1984, he was the board's largest shareholder, owning 2.15 percent of the company's

An increase in the credit line could be used to buy out a shareholder or purchase holdings to impede an unfriendly takeover, said Gordon Crawford, a senior vice president of Capital Research in

Los Angeles.

Meanwhile, the price of Disney stock fell \$1.875, to \$61.50, Thursday on the New York Stock Ex-change. The stock has risen 25 percent since closing at \$50.50 on March 8, but remains below its 52-week high of \$84.75.

Rumasa Flagship Sold To Spanish-Arab Group

MADRID — A Spanish-Arab consortium has acquired Banco At-lantico, the flagship of the Rumasa group nationalized last year, bank-

ing sources said Thursday.

The Spanish cabinet agreed to sell the bank to Banco Arabe Espafiol, the Bahrain-based Arab banking corporation and Spain's Banco Exterior de España for 5.1 billion pesetas (\$33.6 million), the sources said.

Aviation Insurers

LONDON - Aviation insurers around the world had their worst year to date in 1983, paying more than \$450 million on air crashes that killed 988 passengers, the Aviation Insurance Offices Association said Thursday. It said the claims were 55 percent higher than in 1982, when 533 passengers died.

The association's chairman, Denis Floyd, said aircraft insurers paid up on 27 Western-built planes that were destroyed. The insurers were particularly hard hit, he said, by the losses of four jumbo jets in

the last four months of the year. The 1983 losses increased aircraft insurance rates 10 to 50 percent this year, Mr. Floyd said. "Some insurers got their fingers burned and have now dropped out of the aircraft business," he said. merce Department said South Ko- He also said rates for satellites were going up after the U.S. space shut-

All Eyes Remain on the Fed

(Continued from Page 11) certificates of deposits, and on new 101/2 percent. Treasury securities. Rather, they say it was really the upward pres-

many corporate borrowers. "The financial markets have been driving rates higher," said Lawrence A. Kudlow, once the chief economist in the Office of Management and Budget and oow a consultant in Washington. "The tightening you're seeing is a mar-ket-induced move, not a Fed-induced move."

"So far," added a Treasury official who asked not to be named, the Fed is "just sitting there watching."

"If they are going to do anything," this official added, "it will be after oext week's FOMC meeting. They're certainly going to have to make a tough decision. Even then, I don't think they want to

For months, economists have contended that despite Mr. Volcker's urgent warnings that high federal budget deficits threatened the economy, and despite his implied threat that the Fed would force the administration to deal with it by driving interest rates up. the Fed has been what they call accommodative. They cite the acid test of Fed policy — the growth of the money supply.

From the last quarter of 1983 through February, the basic measure of the money supply grew at an annual rate of 7.3 percent, close to the top of the 4-to-8 percent

"M-1 under Carter grew by an annual rate of 8 percent during his four years," Mr. Kudlow said. Through the first three years of Reagan, M-1 has grown by 8 percent annually - the same amount. So the Fed has been just as accommodative under Reagan as it was under Carter."

At oext week's Open Market Committee meeting, the Fed may confirm that it regards as appropri-

French Pact in Hong Kong

PARIS - A group of French construction companies, including Empain Schneider Group's Spie Batignolles, has a 140-million Hong Kong dollar (\$17.9-million) low-cost housing contract for the Hong Kong Housing Ministry, Coignet Entreprise, one of the com-panies involved, said Thursday.

ate the new federal funds rate, 10 to

To some analysts, that might seem a passive move, not a delibersure on the cost of money that ate shift toward more restraint. But forced commercial banks to raise that interpretation may not sit well the prime rate that they charge with the Fed's most touchy observer, the White House. Said Larry Speakes, the presidential spokes-man, this week: "We want interest rates to come down."

U.S. Bill to Halt All Oil Mergers Is Withdrawn

By Robert J. Cole New York Times Service

NEW YORK — Senator J. Bennett Johnston has with-drawn a bill that would have halted all oil mergers for six Louisiana Democrat said he would introduce a new bill soon advancing the effective date of the moratorium to last Wednes-

The legislation thus would oo longer apply to Standard Oil Co. of California's pending \$13.2-billion purchase of Gulf Corp., which first became pub-lic Feb. 28, and Mobil Corp.'s subsequent \$5.7-billion bid to buy Superior Oil Co.

Socal is offering \$80 a share for Guif's shares. Mobil is offering \$45 a share for Superior's stock. Mr. Johnston said oeither of the transactions would be affected by the legislation. They will be able to do their deals without our interference." he said in the Senate Wednes

There has been increasing opposition in Congress to the original version of Mr. Johnston's bill. But there were signs that the change in the effective date of the moratorium would help the legislation's prospects. Sentiment for legislation to bring major oil mergers to a halt for six months had been build-

ing in Congress since early this month. Opposition had come largely from Socal, Gulf, Mobil and T. Boone Pickens, chairman of Mesa Petroleum Co. and leader of an investor group that would have lost heavily if the Socal-Gulf merger had been blocked. The two transactions still face government antitrust scrutiny but have a good chance

Antitrust Official In U.S. Says Policy Is Under Review

WASHINGTON—Assistant Attorney General Paul McGrath, under fire from steel-state senators, defended his handling of the LT Corp. Republic Steel Corp. merger Thursdate while acknowledging that the Justice Department's guidelines are under review.

Mr. McGrath, chief of the department's Antitrust Division, told a Senate subcommittee the despate the tentative approval of the LTV-Republic merger, at was unlikely that a similar merger between National Steel Corp. and U.S. Steel Corp. would be parameted.

He said LTV and Republic agreed to se facilities in Obiocand Alabama to meet Justic Department concentration of market power for certain steel products, but that National and U.S. Steel refused to conside similar changes.

similar changes.
"The companies (U.S. Steel and National were not willing to divest an ownce of capacity,

he said.

Mr. McGrath said the two proposed merger posed special problems because they came before the Justice Department at the same time. Considered together, Mr. McGrath said, the two mergers would have resulted in an impermissibly high concentration of market power for certain steel products, thus violating the Justice Department's threshold for acceptable mergers.

mergers.

They (the mergers) didn't just shade over that threshhold," he said. They moved over that threshhold like a flood.

Mr. McGrath, however, was repeatedly critical cized and questioned by Senators Dan Quayle Republican of Indiana, John Heinz, Republican can of Pennsylvania, and Arien Specter, also see Pennsylvania Republican, for not fully considering the impact of fierce competition from foreign steelmakers in the U.S. market.

"It is absolutely incomprehensible to me ho the Justice Department can ignore competitio they (U.S. steelmakers) get from the world ma-ket," said Mr. Heinz.

Said Mr. Specter: "It may be necessary a legislate to force the Justice Department to tal into account imports in making merger de?"

Mr Quayle told Mr. McGrath his failure address imports was fucling a campaign in Cougress — strongly opposed by the administratic — to limit steel imports to 15 percent of the U, market. Imports now take more than 20 percent of the market.

"We have got to have some flexibility ar 1\1\2 understanding, particularly with steel industry current problems," Mr. Quayle said. "If a don't see that, I think you are going to see son public policy decisions that you are not going." Mr. McGrath acknowledged the Justice D partment is reviewing its merger guideline especially the role played by imports in proving competition for U.S. steelmakers.

But he told the senators that there are areas. the industry where imports did not have mus impact and thus should not be considered major factor in merger cases.

Penn Central Moving Base to Connecticut

The Associated Press NEW YORK - Penn Central Corp. nonneed Thursday that it is moving its heat quarters from New York to Greenwich, Co-necticut, a New York suburb, April 2.

The amouncement said about 195 employed will be affected by the move.

Penn Central moved to New York from Phiadelphia in the late 1970s, Keith Perkins, spokesman, said.

The company makes products and suppli-services in the areas of electronics and defentelecommunications and energy. MARTE.

THE MARCH OF FOLLY: From Troy to Vietnam

By Barbara W. Tuchman. 447 pp. Illustrated. \$18.95.

Knopf, 201 East 50th St., New York, N.Y. 10022.

Reviewed by Christopher Lehmann-Haupt

IN HER latest book, Barbara W. Tuchman — the author of such well-known and successful works as "The Guns of August" and Stilwell and the American Experience in China" - has set herself no less a task than to probe the very roots of folly as it has revealed itself over the long course of human history. Among her conclusions is that folly is sometimes caused by people's "wooden-headed-ness." At other times, it results from "cognitive dissonance," or an unwillingness to listen to the facts. On still other occasions, folly occurs as a consequence of ignoring previous history
—or, one might almost say, as a result of folly. But then it may be that I'm muddling Tuch-

man's message. Let me try another approach.

What she is also trying to do is look as closely as possible at four major acts of folly in burnan history. These are the Trojans' decision to move the Greek horse within the walls of their city; the refusal of six Renaissance Popes (whom Tuchman blithely refers to at one point as "the Renaissance six") to arrest the growing corruption of their church and to recognize the increasing restiveness that would lead to the Protestant secession; the British misrule under King George III that eventually cost England her American colonies; and the United States's mishandling of the conflict in Vietnam.

Tuchman takes pains to point out that she chose these particular examples because they meet three criteria. Those who were responsi ble were warned in advance of the potential for disaster. There were feasible alternatives to the course they took. And it was groups, oot individuals, who perpetrated the foolishness.

The first two seem to me gratuitous since it is hardly a case of folly to act without knowledge of the consequences when there is oo alternative line of action to pursue. The third may be part of what gets her into such trouble in "The March of Folly," for it is hard enough to explain why individuals act a certain way in history, let alone to account for group behavior in the past. As for undertaking to explain four such wildly different cases of folly in human history — well, I suppose if one has promised oneself to square the circle, one might as well go ahead and cube the sphere.

But perhaps I'm still misunderstanding what she is up to. And there is yet another possible way one might approach her new book. In it, she has gathered four historical essays, each approximately twice as long as the one that precedes it. Having ooticed that in each example a group pursues a policy contrary to its own interest. Tuchman has tried to generalize, calling the result "The March of Folly."

But the generalization doesn't work. First, the four examples don't bear any resemblance to one another, except, very superficially, for the British loss of her American colonies and the United States's "loss" of Vietnam. Second. the essays are detailed narrative accounts of certain historical events and oot at all concerned with the search for underlying principles. Thus, when Tuchman gets around to drawing conclusions, she is forced by the breadth of her canvas into uttering fatuities. "Failure of communications appears to be en-demic to the buman condition," she informs us at one point. "Historical mistakes are often irretrievable," she discovers at another.

And in summing up why the Renaissance Popes provoked the Protestant secession, shy drops the following bombshell: "First, it must be recognized that" the attitudes to power of the Renaissance six" and their resultant behavior where the product of the Renaissance six." havior were shaped to an nousual degree by the mores and conditions of their time and surroundings. This is of course true of every person in every time, but more so in this case because the mores and conditions of the Italian governing class of this period were in fact so exotic.

Exotic to whom, besides outlanders lik. Martin Luther and his fellow Northern Europeans, who were bound to find their Southern neighbors exotic? Did the Italian governing class seem exotic to the people they ruled, who one would assume, were part of "the surroundings" that shaped that class? Or is it simply that the mores and conditions seem exotic it.

Tuchman, which leaves her, not for the first o last time in this book, committing the historic: fallacy of judging the past by present stan

But any way ooe approaches "The March o Folly," it is unsatisfying, to say the least. Bette books have been written about Vietnam, the American Revolution, the Renaissance Pope and the Trojan Horse. Better things have been said about human folly. In her book's intro ductory essay, Tuchman cites "a perceptin-comment by Ralph Waldo Emerson." whe apparently once warned, "In analyzing histor-do oot be too profound, for often the cause are quite superficial." The problem is that sh has taken his advice too literally. Not only ha she confined herself to the shallower well springs of history, she has committed the fur ther sin of treating them superficially.

Britain's Talbot Appoints Chief Executive

Talbot UK, the British subsid-iary of Pengeot of France, has named Geoffrey Whalen chief executive officer and has reported its first profit in a decade. Previously assistant managing director for manufacturing, personnel and in-dustrial relations, Mr. Whalen succeeds George Turnbull

Mr. Turnbull's five-year contract as managing director and chairman expires in April. From Talbot he will move to inchcape, the interna-tional trading and vehicle-distribution group, where he has been named managing director.

Jean Boillot, vice president of

Attomobiles Peugeot, the parent company, has been appointed non-executive chairman of Talbot UK,

beginning next month. Talbot made an after-tax profit last year of £3.1 million (\$2.1 mil-lion) in contrast to a £54.7-million loss in 1982. The company was last profitable in 1973, when it earned £3.75 million.

Mr. Whalen's appointment is seen by industry analysts as a vote of confidence by Pengeot in British

The company was profitable last ear largely because of stronger denand from Iran for Talbot car kits. These car kits are modeled on the kd Hillman Hunter, a four-door vere sold in Iran as the Peykan, the ountry's best-selling car. Talbot provided the "guts" of

he car - the engine, transmissions nd suspension - while the Iranias made the rest, including the tor for field operations.

Security Pacific Names Smith Vice Chairman

Security Pacific Corp., with assets of more than \$40 billion, has elected Robert Smith vice chairman and member of the office of the chief executive. He succeeds Frank Cahouet, who resigned to become chairman and chief executive officer of Crocker National Bank, 57-per-cent owned by Britain's Midland Bank PLC

In related moves at Security Pacific, William Ford was elected vice chairman; John Kooken, an executive vice presi-dent, was also elected chief financial officer, and David Lovejoy, Security Pacific's treasur-er, was also elected an executive vice president.

body panels, wheels, battery, trun and glass.

Last year Talbot sold 87,840 kits to Iran, nearly twice as many as it sold in 1982, and shipped £25 million of spare parts to the country. The total value of kits and parts exported to Iran was about £125

Pan American World Airways has named A.L. Rauschenplat, 51 to head the airline's Latin American operations. Mr. Rauschenplat succeeds Patrick J. Oliver, who retired. Previously, Mr. Rausch plat was the carrier's systems direc-

Instrumentarium Pushing Into Diagnostic Gear

By Junis Kaza International Herald Tribune

Kleiner, Perkins, Caufield & Byers, a California-based venture-HELSINKI — Oy Instrumentarium AB was founded in 1900 by capital company, has appointed E. the Finnish Association of Medical Floyd Kvamme as a general part-ner. He will be based in the Palo Doctors as an importer of surgical equipment. Domestic sales and dis-Alto office. Mr. Kvamme was fortribution of about 10,000 medical merly executive vice president, products are still a major part of its market and sales, at Apple Combusiness, but it is the company's puter. Mr. Kvamme is to be in-volved in financing new Silicon push into high-technology diagnostic instruments that has attracted Valley ventures, including electron-ic parts, personal computers and the attention of investors.

U.S. analysts are impressed with the Finnish company's products in the new field of nuclear magnetic resonance (NMR) imaging technology. NMR works by exciting atoms in the body by strong magnetic fields. Energy emissions from the atoms are gathered and formed into images, which allow viewing of soft tissues and liquid accumulations invisible to X-rays.

NMR equipment designed to obtain high-resolution images operates with such powerful magnetic fields that the equipment must be specially insulated within hospitals and climits Instrumental affirm and clinics. Instrumentarium offers lower-resolution equipment that does not require extensive insula-

be quite a good tool for a surgeon, internal bleeding and other fluid but we also try to make this as accumulations in the body or damsimple as possible, so it is not just for people who are highly qualified [image] interpreters."

Mr. Kavervuo said Instrumen-

tarium's NMR equipment could find a market in many hospitals and some larger medical practices as a screening tool for patients, who could then be sent to special centers for examination by the more expensive high-resolution methods. The company expects approval to distribute its NMR ment in the United States. Joe Pikul, an analyst at Amhold

& Bleichroeder Inc., a New York brokerage, calls Instrumentarium "a great slot" for investment and a probable "sleeper stock coming out while net income after taxes, but of the present bear market." But he before appropriations, rose 20 percautioned that a leading New York cent to 60 million markkas. While a hospital had recently vetoed the divisional breakdown of 1983 sales purchase of a sophisticated and ex- was not available, in 1982, sales of that "cost is a factor."

"You can get a very fast screen it costs to purchase ultrasound sysing for emergency rooms," Marti tems, a competing form of technology the company's 38-year-old president, explains. This can fers a rapid means of diagnosing age to soft tissues.

> While analysts are impress with Instrumentarium's NMR products, some are not sure that the company's shares are favorably priced. "I like the NMR." says Gerry Nordberg, a partner in Rein-heimer Nordberg Inc., a New York-brokerage specializing in Scandina-vian securities, "My problem is you have two fairly mundaine divisions. A large proportion of the sales and carnings are in eyeglasses and com-

e first big day of the ready-tocollections was Thursday, red at the end of the show.

Comme des Garçons presented this number in layered gray and black jersey at the Paris ready-to-wear showings

which has become Japanese day. The question in everybody's mind was, "Do the Japanese have anywhere to go?" After the culture shock they produced last season, and with the waves still being felt all over the world, the answer remains: "If beauty is in the eye of the beholder, it will take a lot of leading before arrivages according to the beholder. looking before ordinary people can

Truth is that the Japanese have almost come full circle and they run the risk of walking through the same tracks. The asymmetrical draping, the strange layerings, the weirdo shoes and the equally weirdo make-up (with red ears and no lipstick) were all there, and so was the archaic feeling of the as Lagerfeld, who designs the clothes — bot the impact was not sel collection in addition to his so strong as last season, despite the so strong as last season, despite the

> However, two things have happened this seasoo; Color has caught up with the Japanese and so has the female body. For the first time, and although the Japanese designers still show a lot of black, gray and navy, there was a brightening of the palette. Rei Kawa-kubo, who designs the brand Comme des Garçons, did it with warm and subtle earth shades; her fabrics are reportedly colored in rice fields with natural dyes. Yohji amamoto went further with acid lemon and orange and even frankly

As for the figure, one had the feeling that somewhere under all those layers there was a woman's body. Some of the clothes, notably

The Japanese still have no sense of humor, which makes all the difference between them and the London scene that they have abundantly copied. But they still win hands down with beautiful fabrics and a sense of volume and proportion that comes through forcefully.

The best part of a cleaner-cut Comme des Garçons was the beginning, especially the uneven, lay-ered togas, which mixed chrysanso strong as last season, despite the themum prints with paper-thin, theatrics and head-splitting music. shino hid very normal and understandable clothes under theatrical shapes that floated over the runway like wild, black birds. By far the strongest hand was Yohji Yamamoto's in his showing of the best coats and jackets in town, plus

equally powerful knits. Buyers are now used to reading these clothes, which seem to appeal to the world's youth, who will not dress like the Establishment. Kal Ruttenstein, of Bloomingdale's, for one, had the right approach. "We buy it in small doses," he said. "Tshirts here, skirts and coats there."

Sikh Radical Warns New Delhi of Punjab Revolt

Washington Post Service NEW DELHI - The leader of the radical wing of the movement for greater Sikh antonomy in the northwest state of Punjab warned Thursday that a new offensive by the Indian government against Sikh militancy would assure a re-newal of violence in the state.

The Sikh leader, Jarnail Singh Bhindranwale, said that the government's decision to register a case of sedition against Harchand Singh Longowal, the Akali Party president and head of a moderate Sikh faction, was forcing Sikhs to adopt a "path of revolt." He added that a government ban

on the All-India Sikh Students' Federation had inflamed passions against the government of Prime Minister Indira Gandhi.

Mr. Bhindranwale's remarks, in a statement in the Sikh Golden Temple shrine in Amritsar, underscored the increasing unity be-tween the two leaders at a time when the government appears in-tent on dividing the two factions.

The crackdown on the student's federation and the legal moves against Mr. Longowal are viewed by Sikh activists here as indications of a new government strategy to deal with the Punjab crisis. The aim, the activists maintain, is to oudge Mr. Longowal away from the center of the protest movement and to isolate Mr. Bhindranwale, possibly forcing him into action that would justify the use of securi-ty forces inside the Golden Temple complex, which is heavily guarded

Increasingly, events have slipped beyood the control of Mr. parts of the state to Amritsar to Longowal, who is considered to faor nonviolence, and into the in a unified stand against Mrs. hands of Sikh fundamentalist exGandhi's government. tremists led by Mr. Bhindranwale.

Harchand Singh Longowal ...gets support of radicals

The two movements had acted separately during most of the 19-month-long Sikh agitation for political power in Punjab. Then Mr. Longowal's mainstream Akali Party shifted its protest from rural

federation, which calls for secession, has come under the influence of Mr. Bhindranwale. Amrik Singh, the federation's president, is a close associate of Mr. Bhindranwale, and the students' most militant leaders have been living in the sanctuary of the temple complex and functioning there as a pressure group of hardliners.

Since the arrest of about 100 student activists since the federation was banned on Monday by govern-ment decree, many of its leaders have gone underground. Launched 35 years ago under Akali sponsorship and with a secular character, the students' federation is now accused by the government of operating guerrilla training camps. The guerrillas, New Delhi claims, have contributed to a wave of murder and terror in Punjab that has left more than 80 persons dead since mid-February. About 165 have been killed since March 1983, accjoint capital of Punjab and Haryacording to the government.

The sedition case against Mr. Longowal is based on the publication of a pamphlet he had circulated among heads of government who attended the Commonwealth summit conference in New Delhi in November, in which he accused the Indian government of torture and repression of Sikh youth and with attempting to erode the Sikh cul-ture. In his appeal, Mr. Longowal asked the delegates to pressure Mrs. Gandhi's government for justice for Sikhs.

However, faced with the prospect of offending religious sensibil-ities by sending its forces into the temple complex, and even possibly triggering rebellion by moderate Sikhs throughout Punjab, the government appears uncertain over how to press its case against Mr. Longowal.

In a coociliatory tone, Home Affairs Minister P.C. Sethi said in Parliament on Wedneday that no arrest warrant had been issued against Mr. Longowal and that the filing of an initial sedicoo case, called a first information report, was "purely a technical matter and oothing was being done."

Government spokesmen have offered to refer the political and since expressed a desire to defuse the crisis by reopening negotiations with the Akali Party, an unlikely occurrence if the case against Mr.

Longowal is pressed. However, the dilemma the government faces is bow to deal with the demands put forward by Mr. Bhindranwale's extremist wing, which are not part of the Akali Party's original charter of 45 demands, Mr. Bhindranwale is insisting on recognition of Sikhs as a nation and a separate law for Sikhs. The Akali Party has confined itself to religious demands, most of which have been conceded in principle, and political measures that include increased autonomy but not independence. It also seeks the merger of Punjabi-speaking areas of states contiguous to Punjab and the transfer of Chandigarh, the

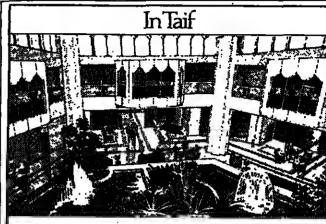

na states, to Punjabi jurisdiction. Also at issue is an Akali demand that flow through Punjab into other

economic demands to tribunals, but the Akali Party insists they are

not negotiable. The impasse has left Mrs. Gandhi in a difficult position in the face of parliamentary elections, which must be held before January. Yielding to the Sikh demands would cost ber substantial Hindu support in Puniah, where Sikhs hold only a 52-percent majority, as well as in the oeighboring states of Haryana, Himachal Pradesh and Rajasthan, which are key voting blocs for Mrs. Gandhi's Congress-l Party in the Hindi-speaking Gangetic plain.

Hamburg Fire Kills Woman The Associated Press

HAMBURG — One woman died and five were injured in four fires that broke out Thursday in Hamburg's St. Pauli red-light disfor a larger share of river waters trict, the police said. A 30-year-old man was arrested on suspicion of states. The central government has having set the fires, the police said.

Nicaragua to Name U.S. Envoy

Reagan Aides Say Guerrilla Heroine Is Unsuitable for Post

New York Times Service MANAGUA - The Nicaraguan government plans to nominate a Sandinist guerrilla heroine, Nora Astorga, as ambassador to

Some Reagan administration officials said, however, that they hoped to prevent Miss Astorga's nomination from being accepted by Washington. They said her activities during the Sandinist-led revolution made her unsuitable for

Miss Astorga, 39, rose to national fame six years ago after a high-ranking Nicaraguan Natiooal Guard officer was found murdered in her bedroom. Since the Sandinist victory in 1979, she has held several important government posts.

The man she said she helped murder, General Reynaldo Pèrez Vega, was the second-ranking officer in the National Guard under President Anastasio Somoza. U.S. intelligence officials said that General Pérez had been a Central Intelligence Agency "asset" in Nicara-gua and that they had considered him a colleague.

Speaking in Managua on Tuessaid, however, that the CIA, the vigor.

del Castro is 56. His revolution,

against other countries as well.

NYSE Most Actives

Defense Intelligence Agency and the National Security Council had opinion on the matter was said to

Under established diplomatic practice, the Nicaragnans would send a formal note to the United States asking for "agreement" that Miss Astorga be the next ambassador. The withholding of agreement is very rare and is usually not publicized. The State Department declined comment Wednesday.

Western diplomats in Managua said a U.S. refusal to accept Miss Astorga because of an act she committed during the revolution would further increase hostility between Astorga called the killing of Gener-Washington and Managua.

This month, the Reagan admin-istration said it would nominate Harry E. Bergold as U.S. ambassador to Nicaragua, replacing Anthony C.E. Quainton. The selection of Mr. Bergold was quickly accepted

Sources close to the Nicaraguan overnment said Miss Astorga had been selected because she has ably advocated the Sandinist cause in countless interviews and speeches, day, Miss Astorga, now deputy for-eign minister, said she expected her Some Sandinists have complained nomination to be accepted by privately that their ambassadors in Washington within four weeks. Washington have not denounced Reagan administration officials the U.S. government with enough

sador to the United States, Antonio already expressed concern about Jarquin, has been in the post about the nomination. State Department a year. Miss Astorga described the change as routine.

Miss Astorga attended Roman Catholic schools in Nicaragua also lived briefly in Italy to United, States. She can law school in Managua and made her first contacts with the Sandinists there in 1969.

After the killing of General Pérez, on March 8, 1978, Miss Astorga disappeared.

Days later, she sent a picture of herself in guerrilla fatigues to the newspaper La Prensa, which published it on the front page. With it was a communique in which Miss al Pérez an act of "revolutionary justice" and urged all Nicaraguans "to participate actively in the process of popular insurrection'

against the Somoza regime.

Speaking in 1980, Miss Astorga. said the decision to participate in the murder was "very painful" for her, especially since it meant she would have to leave her children for as long as the war continued. Soviet Aid Promised

The Soviet ambassador to Nicaragua said Wednesday night the Soviet Union would help mobilize "other world forces" to defend the nation from U.S. aggression, Ren-ters reported from Managua.

Daniel Ortega Saavedra giving a speech in Mexico City, before cutting short his visit to return to Nicaragua.

hit a mine in Nicaragua's Puerto Democratic Force, The United Sandino harbor, 40 miles (65 kilo-meters) southwest of Managua, on Deniel Orteon Seaved the Tuesday. Five crewmen were injured and the ship, which was hauling 250,000 barrels of crude, was heavily damaged.

The mine was laid by CIAbacked rebels of the Nicaragnan Democratic Force, Nicaragna said. The group has acknowledged plac-ing mines at Puerto Sandino. The Soviet foreign minister, An-

Dow Off 14.97 After Rally Fails

United Press International

NEW YORK — Prices on the New York

Stock Exchange took their worst loss in three
weeks Thursday amid investor concerns about
the U.S. budget deficit, interest rates and American Telephone & Telegraph Co.'s threat to cut
its disidend.

7270

its dividend.

Analysts said two portfolio managers executed selling programs early in the day, which depressed prices in blue-chip issues from the outset. But trading was not heavy, indicating that most institutions remained on the sidelines.

The Dow Jones industrial average, which shed 4.92 Wednesday, attempted a rally at midday hut closed down 14.97 to 1,155.88, its worst loss since it fell 22.82 Feb. 28.

Declines topped advances 11 to 4. Volume was 87.3 million shares, compared with 87.2 million Wednesday.

"The volume was not that overpowering and that shows there wasn't a selling panic like we had a few weeks ago," said Dudley Eppel of Donaldson, Lufkin & Jenrette.

AT&T was the most active NYSE-listed issue, off % to 15%. AT&T warned that it might cut its dividend if the Federal Communications Commission did not shift some of the burden of "access" charges from the company to consuners and AT&T competitors.

Gulf Oil, which agreed to a \$13.4-billion merger with Standard Oil of California, was second on the list, unchanged at 75%. Socal lost % to 33%. Superior Oil, which has a \$5.7-billion merger agreement with Mobil, was fourth, off % to 41. Mobil lost % to 30%.

Sum Co., a 5%-point winner the previous two sessions on takeover rumora, tacked on 3% to 53%.

France Celebrates a Forgotten Sculptor, a Buried Life

by Joseph Fitchett

ARIS - Forty-one years after her death in an insane asylum, a sculptor is being rediscovered in France as a feminist heroine, with her story inspiring books, a play, a proposed movie and the first major retrospective exhibition of her art.

At the turn of the century, Camille Claudel was the foremost female sculptor in France and the most-important woman in the lives of the sculptor Auguste Rodin, her lover, and the writer Paul Claudel, her younger brother. Then in 1913, when she was 49 years old, her family had her committed to an asylum. The papers were signed by either her mother or her brother, a rising writer and diplomat who became France's ambassador in Washington and gained acclaim as a playwright and religious poet. At her family's insistence, Camille was kept institutionalized for 30

Now her memory has been revived. Most of her extant works — 70 sculptures plus drawings and etchings - have been assembled at the Rodin Museum in Paris for a major show (until June 11) that is attracting overflow crowds. "We've never seen anything like it," a museum aide says. "We have to turn people away on weekends. They come to see her work, but they really come because of what happened to her."

The show has also rekindled controversy about the magnitude of Rodin's artistic debt to her

and about how he and her family treated her. A play and a biography about her, "Une Femme" by Anne Delbée, portray Camille as a feminist before her time, a victim hoth of Rodin, who, in Delbée's version, exploited her and then feared her, and of her family, which was scandalized hy her. In rebuttal, the Claudel family's behavior is defended in a forthcoming collective biography by Paul Claudel's granddaughter, Rose-Marie Paris, and several psychiatrists and literary critics.

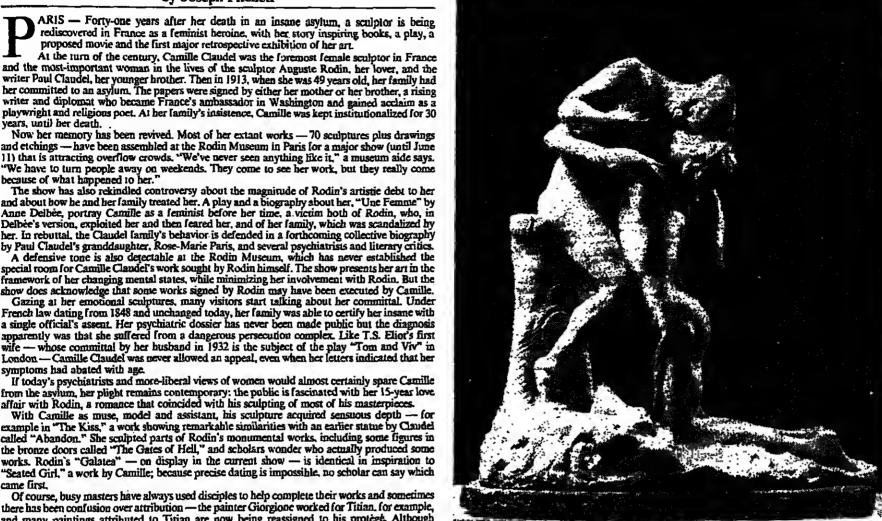

A defensive tone is also detectable at the Rodin Museum, which has never established the special room for Camille Clandel's work sought by Rodin himself. The show presents her art in the framework of her changing mental states, while minimizing her involvement with Rodin. But the show does acknowledge that some works signed by Rodin may have been executed by Camille. Gazing at her emotional sculptures, many visitors start talking about her committal. Under French law dating from 1848 and unchanged today, her family was able to certify her insane with a single official's assent. Her psychiatric dossier has never been made public but the diagnosis apparently was that she suffered from a dangerous persecution complex. Like T.S. Eliot's first vife - whose committal by her busband in 1932 is the subject of the play "Tom and Viv" in

symptoms had abated with age. If today's psychiatrists and more-liberal views of women would almost certainly spare Camille from the asylum, her plight remains contemporary: the public is fascinated with her 15-year love affair with Rodin, a romance that coincided with his sculpting of most of his masterpieces.

With Camille as muse, model and assistant, his sculpture acquired sensuous depth - for example in "The Kiss," a work showing remarkable similarities with an earlier statue by Claudel called "Abandon." She sculpted parts of Rodin's monumental works, including some figures in , the bronze doors called "The Gates of Hell," and scholars wonder who actually produced some works. Rodin's "Galatea" — on display in the current show — is identical in inspiration to "Seated Girl," a work by Camille; because precise dating is impossible, no scholar can say which

Of course, busy masters have always used disciples to help complete their works and sometimes there has been confusion over attribution - the painter Giorgione worked for Titian, for example, and many paintings attributed to Titian are now being reassigned to his protege. Although Camille accused Rodin of stealing her work, few specific sculptures are named in her letters. What is certain is that the quality of Rodin's sculpture declined after she and he separated. Camille's own work revolves around her relationship with Rodin. At first similar to Rodin's

"Abandon," by Claudel.

What Does Bach's Shoe Size or Love Life Tell Us About His B-Minor Mass?

by Donal Henahan

EW YORK - Let us suppose, just for the sake of supposing. that tomorrow a large cache of previously unknown letters of I.S. Bach were to come to light, discovered by workmen excavating for an apartment building in Leipzig.

Suppose, however improbably, that most of the letters were of a

highly personal, confessional nature and only marginally concerned with music. Might musical scholars, nevertheless, be expected to show some interest in examining these papers? Silly question. They would, of course, trample one another in the rush to be first, and justifiably so.

The musicological community's curiosity would be especially stimulated because almost all the surviving prose of Bach is businesslike stuff: arguments with clerical superiors, eulogies of potential patrons, plans for reforming the practice of church music, and the like.

Hardly any scholar writes about Bach without expressing some regret that so many details of his life have been huried by time. They assume, evidently, that knowing these details would help them in some way to understand more about Bach's music.

And yet there has always been a wing of the musicology profession that insists on the essential irrelevance of biography. Its extreme champions contend that the incidents of a composer's life cannot be shown to influence his music in any significant way, and that the proper study of musicologists can only be the composition, not the composer. I hope this does not distort too much the position taken by Eric

Werner, a musicologist (and hiographer of Mendelssohn) who wrote to rebuke me recently for suggesting that Mahler's life and his music were so intertwined that neither could be considered without the other. I said I thought it likely that "the character of his works, with their febrile manner and drastic emotional swings, was largely determined by his St. Sebastian temperament and unstable mental state.

Werner rose against this heresy. If I believed that, he wrote, how could I explain "the Olympian joyfulness of Mozart's 'Cosi Fan Tutte,' written at a time of total financial ruin, general lack of acknowledgement, and the break just before his father's death?"

Well, in the first place. I am a little surprised that Werner would select "Cosi Fan Tutte" to illustrate his point. Of all Mozart operas, this might be the one most closely tied to his personal experience.

It does, of course, have its moments of "Olympian joyfulness," but it also is a reminder that Mozart bad arrived at a painful point in his married life. He could sympathize with a da Ponte libretto that not only accepted but embraced the moral frailty of men and women. We know his letters that Mozart worri great deal about reputation, and possibly her fidelity. And there is reason to suspect that Constanze (wonderful name) had reason to worry about a husband who, as he grew older, certainly took to gambling and running around with questionable companions.

Knowing even a few such details of the composer's life, we are in a position to listen differently to "Cosi" than we otherwise might. We hear a strain of regret in the music, a vein of rueful cynicism running just beneath the happily hubbling surface. "Cosi" is only superficially a charming tale 11 is a confession of lost innocence. And so, as any responsible coach or teacher will tell you, a singer who has studied Mozart's life as carefully as his notes has a better chance of getting to the heart of the music than one who treats the score as an abstract

Do f belabor the obvious? Perhaps. But Werner's position is one held by many musicologists who like to look on their profession as a branch of science comparable to mathematics or physics. In fact, in defending its purity, they take an ideological, almost theological, view of the

bject.
"Musicology," Werner goes on, "does not deal with Beethoven's
"Musicology," Werner goes on, "does not deal with Beethoven's paramours, nor Handel's bouts with sniffles, nor with the sexual potency

of Bach, who sired 20 children... Musicology deals with the history, the substance, the structures of an art which sometimes, but by no means always, reflects the psychic situation of the creative artist. It is by no means bound to intrude into his innermost and intimate privacy.

"The Kiss," by Rodin.

But, of course, musicology as it is actually practiced by most of Werner's professional colleagues does deal with all those things. It is only Werner's austere brand of musicology that does not.

You have only to look into any respected journal to see the details of composers' lives examined from every possible angle. The question of Beethoven's "paramours," for instance, has been a staple of Beethoven scholarship for more than a century. Handel's health problems ecifically, his blindness late in life — have hardly gone undocumented. Granted, the sexual potency of Bach has not been discussed much in musicological journals, but I suppose that is because his total issue is just about the only issue of Bach scholarship that has never been in dispute.

The point is, pace Werner, that it is ridiculous to attempt to exclude everything from musicology that one particular musicologist is not interested in. Denis Stevens, who takes a more ecumenical view in his "Musicology: A Practical Guide," illustrates again and again how the study of a composer's life can add to comprehension of his music.

Discussing Monteverdi's letters, he says that "it will be noticed at once that the flow of words not infrequently bears comparison with the best of his music. In many of the longer letters, there can be sensed the same white heat as from a creative crucible whose fusion of improvisation and formal discipline brought into being a tant masterpiece such as the 'Combattimento' or the chaconne 'Zefiro Torno.'

And, Stevens goes on, "Apart from giving us a clear picture of the composer's personality, as it developed over the last 42 years of his life, the letters reveal sharply focused details of his professional career, in addition to colorful vigneties of some of the musicians and courtiers he knew and with whom he collaborated."

But why in the world would anyone want to know all those details about Monteverdi's life if they had no bearing on the music be created? Who would care to plow through Ernest Newman's multivolumed life of Wagner, or Cosima's interminable diaries, if not to learn more about the music? Why would we go back again and again to the voluminous Strauss-Hofmannsthal correspondence?

In some way, any reasonable person would agree, an artist's life and his art interlock and need to be considered as a whole phenomenon. Stevens quotes with approval the introduction to Edward Lockspeiser's "Music and Painting," which makes the point that present-day musical history "is largely based on the idea of technical analysis. This is not gical age. The hu seems to be overshadowed."

Stevens points out that "il is incomparably easier to write plausible analysis than to give the impression that musical criticism should belong to the sphere of humane letters." Similarly, it is easier and safer to restrict research in musical history to the accumulation of documents than to venture out into the dangerous waters of historiography.

But venture we must and venture we will. To some extent, the paucity of personal detail that has come down to us about composers of the comparatively distant past such as Bach bas contributed to the idea that their music was composed by abstractions, not human beings. The "pure" musicologist, understandably, often tends to specialize in periods where biographical detail is scarce or nonexistent. Nothing obtrudes to disturb the peaceful gathering of lactual shards and fossils. That is a

useful and responsible occupation, good for what it is good for. But there are other ways to approach the history of music. If you want to understand the music of Mahler, for one, you will get only so far by looking into the scores. At some point you will have to look into his life, and perhaps your own as well.

'It's Caused Trouble,' Burgess Says Cheerily About '99 Best Books'

by Alan Levy

IENNA — Anthony Burgess has created the year's first literary stir with a paperback quickie of a list called "Ninety-Nine Novels," grandiosely subtitled "The Best in English Since 1939" and modestly subtitled "A Personal

Why 99? Why the arbitrary period beginning with Henry Green's "Party Going" (1939) and ending with Norman Mailer's "Ancient Evenings" (1983)? Why such writers as Len Deighton ("Bomber"). Ian Fleming ("Goldfinger") and Erica Jong ("How to Save Your Own Life")? Both Paul Theroux ("The Mosquito Coast") and his brother Alexander ("Darconville's Cat") in the same year (1981)." Saul Bellow for "The Victim" and "Hum-boldt's Gift," hu not "Herzog" or "Henderson the Rain King"? And why so many American

authors anyway?
In Vienna for a weekend to promote the German translation of his novel "Earthly Powers" and to give an hourlong reading in English at Shakespeare & Co., Burgess comes to lunch bristling with ready answers. Having just cut his nose shaving with a "contoured razor designed to do everything but give you a shave," he orders soup and strudel and asks to see his interviewer's copy of "Ninety-Nine Novels,"

"I haven't received one myself yet. I saw it at Shakespeare last night and kept peeking at the copies I signed, but didn't dare ask for one of my own. Such is my devotion to the German language and my very good translator [Wolfgang Kregel that I came here instead of going over to London to promote the '99 Best Books.' Anyway, it seems to have promoted itself without me, don't you think?
The confessional continues:

ft's a silly, frivolous book. The idea was to get it written in two weeks and published in two months. I had most of the 99 books on my shelves. If not, I had already written brief articles about them, mostly for The Observer, that I could dig up in files, so it wasn't too big a

Having with right modesty excluded myself from my list." Burgess explains away the arbi-trary number 99: "The reader can decide on his own 100th. He may even choose one of my own

"Ninety-Nine Novels" (London: Allison & Busby: New York: Summit Books) was a reac-

tion, "an answer, if you will, to the official list brought out by the British Book Marketing Board, which chose the 13 best books since the war. They had a kind of committee of, I thought, not very well-qualified persons."

Burgess - a puh intellectual who has been depicted as "eating and drinking the way he writes; with indiscriminate pleasure" — lights a cigar before expounding on culture-by-com-

"And their choices were absolutely ridiculous! But what annoyed me was this damned British parochialism that shoves in someone like Elizabeth Taylor - not the famous actress, but the comparatively unknown writer because Elizabeth Jane Howard likes her, and they leave out books like Ralph Ellison's 'Invisible Man' and Mailer's 'The Naked and the Dead' and Thomas Pynchon. Even the committee had to agree that some major books are coming from America. But what's damnable is that taxpayers' money is going into the promo-tion of books like 'The Catcher in the Rye' or 'Herzog,' which don't need the British taxpayer, I think they and 'Lolita' were the only three American books.

(The Ellison and Mailer novels are on Burgess's list, as are Pynchon's "Gravity's Rainbow" and J.D. Salinger's "Catcher in the Rye." In "Ninety-Nine Novels," Vladimir Nabokov is represented by "Pale Fire" and "The De-fense," but not by "Lolita.")

The official British list, Burgess insists, was

"so bloody stupid that I said: 'RRRight! Let's take a long look at this and do it a little more seriously." He cast his vision had for the He cast his vision back farther than the committee did: "To 1939, because you can't leave out a book like 'Finnegans Wake,' which was published that year."

Summing up his feelings about his book, the 67-year-old Burgess says: "I'm glad to hear it's caused trouble in London. I hoped it would."

Among those it has upset is Graham Greene, who "turned up in London for the lunch they gave for the 13 best novels," Burgess says. "I was invited, 100, but didn't turn up. Graham mentioned my book and said that Burgess is an

avid reader, but totally indiscriminating." His disagreement with Greene, both Burgess and his wife remark at different times, dates from when Burgess "did an interview with him for The Observer some years ago and later he said: Burgess put words into my mouth that 1

Anthony Burgess.

had to look up in the dictionary." Burgess savors Greene's saily and concludes: "Clever. but not worthy of a friend."

Other complaints about "Ninety-Nine Novels" were in a higher key, says Burgess. "They came from British reviewers for my trying to take a bigger stance. I've always admired the American novel and probably given it more

space than most British critics would like. And I brought in American novels that no one in Britain knows: not just Alexander Theroux's 'Darconville's Cat,' which is mad, erudite. word-drunk. Rabelaisian, Joycean, Sternean, but Walker Percy ("The Last Gentleman") and

The Greening of Ronald Reagan

by Daniela Iacono

ALLYPOREEN, Ireland — Ballyporeen is a one-street farming village like hundreds of others in Ireland, but the Town of Small Potatoes, as it is known in Gaelic, has one thing going for it - President Ronald Reagan.

Ballyporeen's 350 inhabitants still make telephone calls on crank-up phones. Cows amble along the road munching grass and the smell of manure hangs heavy over the state-gray row of houses. Its total security

force is two policemen. But Reagan is certain to shake the village into the 20th century during his trip to Ireland June 2-4, when he is widely expected to stop at Ballyporeen, 30 miles (48 kilometers) northeast of Cork, the spot closest

to his great-grandfather's birthplace. Whether he intends to woo the Irish-American vote, as critics contend, or is anxious for a first-hand look at his roots, as supporters say, Reagan is by far the most exciting thing that has ever happened to the southern Irish village.

"Words couldn't put it together how we feel," says a farmer, Liam

Roche "Even if the president stays five minutes, it's a fact that he'll have come to Ballyporeen," continues Roche over a pint of Guinness in one of the village's six pubs — the Ronald Reagan Lounge.

John O'Farrell, its owner, says he changed the name of his pub in 1980 after Debrett's Peerage, the British genealogists, traced Reagan's roots back to Doolis, now an uninhabited swamp about three miles west of Ballyporeen.

The news stunned the village, O'Farrell says.

"It really changed everybody's outlook, gave them a sense of pride and achievement, that his great-grandfather came from our humble village," O'Farrell explains.

Debrett's found that Reagan's great-grandfather, Michael Reagan —

the name is also spelled Regan and O'Regan in the village register — was baptized in the Ballyporeen Roman Catholic church on Sept. 3, 1829. Michael married Catherine Mulcahy in London in 1852 and then emigrated, with his two brothers, to Illinois after Ireland's five-year potato famine, which ended in 1851 after almost a million Irishmen had

died of starvation.
"Michael and Catherine were just two of the million people who left

Ireland at that time," says the Rev. Eanna Condon, the parish priest,

who keeps the village records. Father Condon says the Reagan ancestral home "was certainly made of mud, with a hole in the roof for a chimney and a peat fire in the

middle of the room. The land is just boggy swampland. O'Farrell, however, is selling soil from the Reagan land for 50 pence (43 cents) for a tiny packet. His wife, Mary, goes out to collect more earth when supplies run out.

In a new gift shop over his Ronald Reagan Lounge he also stocks Reagan T-shirts, a wooden Reagan family crest for 40 Irish pounds, a Reagan silk batik for 45 pounds and pictures of Reagan on horseback as a Hollywood actor. A nearby grocery store sells Reagan bumper stickers saying, "I've been to Ballyporeen, have you?"

O'Farrell, who hangs an antographed picture of Reagan over his open

fireplace, has not the slightest doubt that the president will visit his pub. "I'm as certain he will open the doors and order a drink as I am certain of anything in this life," O'Farrell says.

Reagan's Ballyporeen roots already have made the misty village a port of call for vacationing Americans.
"We planned it on our vacation," says Pat Russell, from Long Island. over a pint in the Ronald Reagan.

"We're big Reagan supporters and we're planning to send him a picture of Ballyporeen," says Ron Vallar, a social studies teacher from Queens, New York. "I doubt he'll see it, but we'll send it to him ATIVWAY.

Officials estimate that 20,000 to 50,000 Irishmen will come to Ballyporcen to catch a glimpse of Reagan. The Irish government is building a landing pad on the green outskirts to accommodate any presidential

"It's going to be a real zoo when he comes," Russell fears. "I'm not sure a lot of the people here are aware of the sheer monstrosity of the thing," says Father Condon.

Residents are confident that an antomatic telephone dialing system will be installed by the time the president arrives. But not many other alterations have occurred.

"It can't change Ballyporeen," says Con Donovan, a local councilman and grocery store owner. "This is a country town and it'll remain one."

What's Doing in Shanghai

by Christopher S. Wren

HANGHAI — The noise and bustle of the 12 million inhabitants of Shanzhai. China's industrial and commercial center, can jolt visitors, and anyone searching for Oriental screnity will not find it here. The city's origins as a fishing village vanished under concrete long ago, and Shanghat flow suffers with all every contemporary

but beyond the grimy facades of once-ele-gant buildings lining the Bund, the promenade along the Huangpu River, throbs China's most fascinating and romantic city.

The honking, bell-clanging din intimidates some visitors into viewing the metropolis from behind the glass of an air-conditioned bus. But if you are curious and willing to flow with the crowds, the rewards of this deceptively West-ern-looking city can make Shanghai the high point of a trip to China.

When the Western colonial powers divided Shanghai into concessions in the latter part of the 19th century, they left intact the walled old town where many artisans and traders lived. Even after the wall was torn down in the early 20th century, Westerners were warned against venturing into this quarter without a bodyguard. Today the worst that can happen is to get lost.

Some package tours omit old Shanghai because tour buses get stuck in the narrow, winding streets. But through your hotel you can arrange a taxi to take you there for the yen equivalent of a couple of dollars and wait for you for about a dollar an hour more.

From the parking lot of the Shanghai Old

Town Restaurant, walk a minute or so down

ing 100 small specialty shops. At glassed-in food stalls, you can watch cooks prepare snacks like fat-steamed dumplings (baozi) stuffed with meat or vegetables, and you may sample them by quencing up with other customers. As you wander past people in faded denim, schoolchildren in red pioneer scarves and soldiers on furlough, you will emerge at a small square pond at the center of which an ornate five-sided teahouse, called a

wacinting stands on wooden stilts. Cross over to the teahouse on a bridge that zigzags to keep out evil spirits. (Any sensible soul knows that such spirits can only travel in a straight line.) The teahouse is a good spot to rest and have a cup of Dragon Well tea, costing about 8 cents. As you enter, buy a chit for tea, coffee or cocoa at the cashier's booth. The first floor is open from 5:30 to 11:30 A.M. and from 1 to 4 P.M. (For reasons best known to the management, the teahouse closes for lunch.) The second floor, which affords a better view, is open from 7:30 to 10:30 A.M. and from noon to 4 P.M.

As you cross to the other side of the lake, you can have your picture taken by a young photographer. Bystanders probably won't mind if

back to familiar territory by walking east along Fuyou or Renmin Roads for about 20 minutes. Notice that, because the interiors of the way are cramped, domestic chores spill out onto the street. Housewives flush out nightsoil buckets or scrub kitchen utensils, Itinerant barbers give haircuts, and men congregate around carts to play cards or give advice. It's one of the best shows in town.

On the north and east sides of the Old Town pond is the Yuyuan or Happiness Garden, covering five acres and dating from the 16th century. It employs the classical elements of water, trees, rocks and waterside pavilions and has an artificial hill of limestone with a small cave. It also has at least 30 halls; pavilions and towers. Yuyuan was the headq of an unsuccessful peasant rebellion in 1853. Today it is favored by honeymooners. It closes for lunch, so arrive before 11:30 A.M.

f you sail a dozen miles to Wusong where the Huangpu converges with the Yangtze, you will see another side of Shanghai: a major port clogged with sleek steamers, rusty freighters, warships, barges and sailing junks. The round trip takes four hours and costs \$6 on the upper deck, where foreigners are encouraged to ride. Tickets are sold at the wharf on the Bund just north of the Peace Hotel.

Changhai cuisine offers excellent seafood, Othough the preparation can be oily. The Old Town Restaurant at 242 Fuyou Road specializes in steamed crab, carp and stewed turtle. The Yangzhou Restaurant at 308 East Nanjing also features Shanghai-style cooking but includes dishes from neighboring Jiangsu and Zhejiang provinces.

Fuyon Road and turn right into areades hous-For spicy Sichuan cuisine, try the Sichuan Restaurant at 457 East Nanjing Road or the Luyangcun at 763 East Nanjing road. Milder Cantonese food is served at the Xinya restanrant at 719 East Nanjing Road and the Meixin at 314 South Shanxi Road. Chinese patrons can dine well for less than \$5 a person, but foreign visitors are usually charged a higher, fixed price of \$10 to \$15 a person, which covers a set dinner.

Though Shanghai boasts more than 600 res taurants, the best are invariably crowded, so a reservation is essential. Bear in mind that few Chinese restaurants stay open after 7:30 P.M.

If you prefer to order a la carte, go to the eighth-floor diming room of the Peace Hotel. The service can be slow and surly, but from a window table you can pass the time watching ships on the river. Some Western expatriates favor the dining rooms of the Park Hotel, across from the People's Park, where a special-

ty is shrimp sauteed in egg whites.

Shanghai is the only Chinese city with a tradition of Western cuisine. The Hong Fangzi, or Red House, at 37 South Shanxi Road was called Chez Louis in the old days. Young men take their dates there to show off with a knife and fork. The restaurant is known for its baked you ask them to join you. Four photographs clams (\$2.50) and vanilla souffle (\$3). Quasi-

cost \$1.40. They will be mailed to you if you pay a little extra for postage.

If you have dismissed your taxi, you can get back to familiar territory by walking east along Western pop songs. Most entress cost about .

53. indifferent steaks about \$6. For a flaming finale, order omelette Vesuvius (\$3), a type of baked Alaska set ablaze with a sorghum liquor called mantai.

> Visitors to Shanghai usually have no choice as to where they stay. The China International Travel Service allocates rooms, of which there has a been a chronic shortage. But several hotels are worth requesting because they are

The Peace Hotel, known as the Cathay before the Communist takeover in 1949, offers the best location, overlooking the Bund and the Huangon River. The rooms are old, the carpets worn, the bathrooms remniscent of a neglected rent-controlled apartment. Worse, the management has sealed off the grand staircase, preventing a fast exit in case of fire. Yet its reputation as China's finest hotel of prewar days lingers. A room for two is about \$40 a

The Jinjiang Hotel, a complex of buildings in a garden of the old French Concession, also retains some of its former elegance in its panelled walls, parquet floors and leaded windows. Rooms for two range from \$21 to \$30 a night.

The Shanghai Hotel, a 30-story high-rise, was opened last fall. Its location, near the Shanghai Exhibition Hall, is less central, but rooms are tidy and the young staff tries hard to please. A room for two costs \$30.

T ike other Chinese cities, Shanghai has the usual Friendship Store selling mementos and other goods for hard-currency certificates. It is worth visiting the store at 33 East Zhongshan Road to look at wares not available in other cities, including locally made silk cloth and hand-carved wooden figures, such as a boxwood chess set. The store has an annex filled with brush paintings and calligraphy on silk scrolls and another devoted to antiques.

One of the best selections of antiques in all

of China, however, can be found in the antiones and curios store at 218-226 Guangdong Road. Prices are high, especially for furniture and porcelain, but everything bears a red wax seal, which is necessary for export. The store is accustomed to shipping purchases abroad.

East Nanjing Road is Shanghar's busiest shopping thoroughfare. Follow it west from the Bund to the No. 1 Department Store at 830 East Nanjing Road, which offers the widest selection of Chinese-made consumer-goods, ranging from bicycles to shoelaces. Some good buys are blue cotton sweatsuits and white Tshirts emblazoned with Chinese characters representing "Shanghai," corduroy shoes and slippers, canvas tote bags, workers' jackets and caps, local textiles and toys. The store handles 150,000 customers a day. Most of them are as fascinating as the merchandise.

A Forgotten Sculptor Continued from page 7

powerful, elemental figures, her sculptures gradually evolved toward personal feeling. If erotic passion is extolled as their affair starts, painful oss marks their process of separation. Finally, her sculpture embodies childlike faith in the future as she retreats into solitude.

When they met in 1884, Camille was 19, Rodin 43. She was a beautiful, headstrong and talented girl who had grown up in a freethinking provincial family from the Champagne region. Rodin, a controversial figure on the verge of international recognition, was living with an older woman and former model, Rose Beuret. Also from Champagne, she was a homemaker, a former seamstress, not an aspiring artist, and stood by him during nearly two decades of struggle.

For Rodin, Camille was apparently the one person capable of sharing both his art and his lusty temperament ("the god Pan," Isadora Duncan called him when, as an old man, he sketched dance movements and courted dancers.) For Camille, Rodin was the ideal provider: an atclier, models, money for marble, entrée to Paris society, which was the sole

source of commissions for statues. A century ago, none of these assets was available to a woman without social position or a fortune.

The pair rented a tree-shaded old house, the Folie Neubourg, on the southern outskirts of Paris, which had been a hideaway a half-century carlier for George Sand and Alfred de Musset, Camille's work was quickly accepted for major art exhibitions and - despite her lifelong aversion to social occasions - she and Rodin became a well-known couple in Parisian artistic circles.

Waiting for Rodin to leave Rose Bearet and marry her, Camille hid the affair from her parents. Her father, a civil servant, was a stern man with a strong temper but a soft spot for his favorite child, Camille. Her mother, described in contemporary reports as emotionally cold, resented Camille's self-confidence. Nor was it any easier with her siblings. Her younger sister, Louise, worried that Camille's unconventional ways would compromise her own social ambitions. Between the two sisters in age was Paul, who let Camille introduce him to literary circles in Paris. But the bond they had enjoyed as children frayed as Camille devoted

In 1893, Camille and Rodin spent the summer in the Loire valley, near Saché, the village where Honoré de Balzac did much of his writing. Ostensibly, Rodin was doing research for the statue of Balzac that was one of his greatest works. In fact, there was widespread speculation that Camille was using the provincial retreat to recuperate from a miscar-

Around this time she began to realize that Rodin would never leave Rose Beuret and marry her. (He married Benret, who years before had borne him a son, in 1917, four years after Camille was interned and only a few months before Beuret and then Rodin died.) Camille's letters from 1895 contain lewd caricatures expressing her disgust at Rodin's ties to

Back in Paris, Camille had a short but intense relationship with the composer Claude Debussy, whom she met at a poetry reading in the home of Stephane Mallarme. For the rest of his life, Debussy kept "The Waltz," her erotic statue of a swirling couple, on his writing table.

Gradually. Camille prepared to break with Rodin. Romantic disappointment was only part of her decision; she resented being kept in Rodin's artistic shadow, referred to as his disciple instead of his equal. Paul Claudel apparently urged his sister, who had dominated his childhood, to leave Rodin. His disapproval of their relationship is usually explained as having stemmed from his puritanism (he had recently undergone a mystical experience in Notre Dame Cathedral and become an ardent Catholic in an act of rebellion against his atheistic father and free-thinking sisten). Today it is seen to prograte that father and free-thinking sister). Today it is easy to speculate that another motive may have been Claudel's jealousy about Rodin's ability

to captivate his adored sister.

In 1895, Camille left Rodin, devoting herself to her sculpture. Her most-moving work from this period depicts a nude girl with her hands raised in supplication. "My sister, kneeling and naked, losing her soul, her genius, her reason, her beauty, her life, her very name," Paul Claudel wrote. In a final variation of the figure completed years later and called "Destiny," Camille shows the young woman on her knees pleading with

a large male figure carrying an aging female on his back.

On her own, Camille kept a few influential admirers among Paris'a critics and collectors, but without Rodin's support, her situation became difficult. Art galleries, still a rarity in this period, dealt only in paintings; scriptors had to rely on patronage for their expensive work. Living alone, Camille was "a mistit in a society where a woman was supposed to be either a wife and mother, or nun, or whore," writes a contributor to Rose-Marie Paris's book.

While Rodin's success spread across Europe and to the United States Camille, withdrawn before, became almost rechsive. Convinced that Rodin was stealing and selling her ideas, Camille was increasingly unstable. Psychiamsts, writing in the Paris biography, speculate that Camille's feelings of persecution reflected her belief that Rodin had

She became an eccentric, burying herself in her atelier on the Quai de Bourbon on the lle Saint-Louis. Convinced Rodin was spying on her work, she began regularly to destroy her sculptures as soon as she completed them. Photographs show her lithe body thickening, and contemporary accounts describe her vivacity turning to hysteria.

In March 1913, her father died, and a week later she was arrested and interned at an asylum outside Paris. Two months later she was trans-

interned at an asylum outside Paris. Two months later she was transferred to an asylum at Montdevergues, near Avignon in the south.

Never, for the rest of her life, was she allowed out.

As the years passed, Camille seldom blamed her family for her plight.

Instead she accused Rodin, charging him with manipulating her family to keep her interned because, she said, Rodin feared she would eclipse his reputation after his death if she were free to work.

Rodin did almost nothing to help her, twice anonymously sending her 500 francs, a derisory sift coming from a man who was earning 30,000

500 francs, a derisory gift coming from a man who was earning 30,000 francs for a bronze bust. Fearful of being poisoned by Rodin, Camille refused to eat any food except eggs and potatoes in their skins, which In any case, only her family, and not Rodin, could get her released. Despite a stream of lucid, moving letters about the torments of her

confinement, Camille was never moved to an asylum nearer home, evidently because of her mother's objections. The family rejected doctors' recommendations that Camille be allowed to return to live metly in Villeneuve, the village in Champagne where she grew up.

Paul Claudel occasionally visited his sister, but never moved to free her. Now an acclaimed writer and Catholic militant, he never publicly admitted any guilt about his behavior toward his sister. Although he wrote tenderly in articles about her work, his plays reflect darker themes related to Camille: An early fascination with taboo love gave way to the belief that some people must be destroyed so that others may succeed. Camille never again touched modeling clay or sketched a figure. In 1943, she died. When, 12 years later, a branch of the Claudel family

asked permission to move her body to a family mansoleum, the French anthorities replied that all trace of it had been lost.

ROYAL

The shops in the Palais Royal arcades are as unusual as the Palais

itself. There is the firm of Guillaumot, specialists in heraldry and engraving, which has been in the Valois gallery since 1784. At L'Oriental

on the same side of the garden, custom-made pipes have been a specialty for more than 100 years. On the other side of the garden in the Montpensier gallery, Bacqueville, Marie Stuart and the Duc de Chartres

are specialists in medals and decorations. Their customers are medal

holders who come for new rosettes for their lapels as well as collectors

Anne Joliet deals only in music boxes in her small shop in the

Beaujolais gallery. The boxes range in price from 40 to 12,000 francs (\$5

to \$1,500) and offer selections from Bach, Mozart, Charles Trenet or the

Beatles. La Boutique du Palais Royal offers original games and hand-made toys, new models of ancient games and even handmade bird cages.

The best-known tenant of the Beaujolais gallery is Le Grand Véfour.

which has been a restaurant in one form or another since 1785. (Just

before last Christmas, a bomb exploded outside one of the restaurant's

windows, injuring eight patrons and shattering some of the elegant painted mirrors that date from the days of the Palais Cardinal.)

For 30 years, Le Grand Véfour was in the elite company of three-star

restaurants in the Michelin Guide — until last year, when it dropped back to two. Earlier this year Raymond Oliver sold the restaurant to the Taittinger champagne family, which says it will restore and preserve its

There are two smaller restaurants in the Palais Royal: La Gaudriole,

which specializes in the cooking of the southwest of France, and Muscade, more of a salon de the, which serves light meals at lunch and in the evening. La Gaudriole has a menn at 110 france plus wine and

service, and Muscade has an 80-franc menu. Le Grand Véfour, three

Because it is in the northern arcade of the Beaujolais gallery and

opens on the street, Le Grand Velour can stay open as late as it wishes.

The two other restaurants must close earlier. Each night, at around

10:30 P.M. in summer and about 9 P.M. in winter, the watchmen close

the garden, leaving it to the enjoyment of only the fortunate few who

have apartments in the magnificent buildings in this enclave of Paris.

7 1984 The New York Times

stars or two, will cost at least 400 francs a person.

8th-century elegance.

would be seen that a the armically deganized with hero has to be in too many places, but Would's evocation of prewar Berlin, for instance, is first-rate. Novelists in England won't to this kind of homework. Besides, Would is one novelist I reread with pleasure. His Youngblood Hawke' is the best novel about a covelist written in this contury. Anthony Burgess's life story has the makings of 99 novels in itself. A Briton who lives in longco, a musician of some eminence and considerable erudition, he saw his literary cageer flower after a death sentence in the late 950s. After a decade of impoverished schoolwould be something for my widow."

Peace in the Heart of Paris

by Frank J. Prial

the Palais Royal, hidden away in the center of one of the great 17th-century and 18th-century buildings in the city. The splash of the fountains and the occasional clink of a glass at one of the two small

outdoor restaurants is the only noise. It is more like a cloister than a park

in the middle of a city.

The garden of the Palais Royal is peaceful because, even though it

faces the Louvre and is not far from the frantic Place de l'Opèra, it is set

aside from the life of the city. It's peaceful, too, because the Palais Royal is not easy to enter. The Palais faces the Louvre, but to get to the garden one goes through an arcade separating the Comedie Française and the

Conseil d'Etat, through the inner courtyard of the Conseil, called the

Looking through the arcades from the street gives no hint of the handsome park within. At the north end, the entrance through the

Galerie de Beaujolais is almost as obscure. The gallery opens into the tiny Rue de Beaujolais, which is more a walkway than a street and which

is itself hidden away behind old buildings facing the busy Rue des Petits

Champs.

There are small entrances through the Rue de Montpensier on the west side of the garden, and the Rue de Valois on the east, but these

streets lead nowhere but around the Palais and are not much frequented,

The Palais Royal started as the Palais Cardinal. Richelieu bought the property in 1624 and, eight years later, built a huge palace on it. After his

death in 1642, the Palais Cardinal passed to the king, Louis XIII, who

died shortly thereafter. His widow, Anne of Austria, disliking the

Louvre, then the royal palace, took her son, Louis XIV, and moved across the road to the less-grandiose Palais Cardinal. It has been known as the Palais Royal since, even though the family moved back to the

The Palais Royal passed to Louis's brother, Philippe de France, and, in 1780, to Philippe d'Orléans. Perpetually short of money, Philippe d'Orléans conceived the idea of a real-estate development surrounding

three sides of the gardens of the Palais Royal with apartments on the

upper floors, over covered galleries lined with shops. His architect was

Victor Louis, who had done the opera house in Bordeaux. The galleries,

like the three streets outside the extended Palais, were named after the

dependencies of Philippe's sons: Valois, Montpensier and Beanjolais. Between 1786 and 1790, a theater was built on the southwest corner of

. The new galleries were an instant success. Tom Paris came, as one

writer said, "like ants to sugar," to shop, to dine and to gamble. For a

- long time near the end of the 18th century most of the garden was

occupied by a circus. There were a wax museum, small theaters featuring magic acts and contortionists, a "Café Mécanique," gambling rooms—mostly roulette—and, in the apartments above, brothels. The cafés

were filled with actors, theatrical agents, writers, publishers, journalists

In 1804, according to the Paris historian John Russell, the Paris city

directory listed 17 billiard parlors, 11 loan sharks and 18 gaming houses in the Palais Royal. In 1820, Franklin Didier, a Baltimore physician then

living in France, described the Palais Royal to a friend at home: "In one

building," be wrote, "can be found a gun shop on the ground floor, a

restaurant on the second, a gaming room on the third, a prostitute on the fourth and a priest on the lifth."

Oliver Wendell Holmes, who studied medicine in Paris in the 1830s, later wrote of that epoch: "What Paris was to France, the Palais Royal

In 1838, gambling was banned and the Palais Royal went into decline.

Much of it was burned during the Commune, then restored between

1872 and 1876. At the turn of the century it was the center of the jewelry

-business in Paris but most of the companies left, first for the Avenue de

l'Opera and, more recently for the Rue de la Paix and the Place

For many years, the Palais Royal slept quietly, its shops empty, the

garden gone to seed, the great fountain dry and filled with trash. Just before World War II, two of its best-known residents, Jean Cocteau and

Colette, joined others in forming the Association of the Friends of the Garden of the Palais Royal. Under the group's auspices, the magnificent

parden has, bit by bit, been restored. There is still much work to do, but

rees have been planted and the fountains play in the long Paris twilight.

The five novels be produced in that one year in London — "The Doctor is Sick," "One Hand Clapping, "The Worm and the Ring," "The Wanting Seed," and "Inside Mr. Enderby" — include some of his best writing. This led to republication of the "Malayan Trilogy," which he wrote while teaching in the

Although "Earthly Powers" (1980) is "what many regard as his masterpiece," according to the Dictionary of Literary Biography, his best-known novel is "A Clockwork Orange" (1962), thanks to the film Stanley Kubrick made from it. Written in Burgess's fusion of Russian with British teen-age underworld slang, "Orange" begins with 15-year-old Alex and three friends singging an old man, tearing up his books and stripping him of money and clothes — or, rather, Alex and his three droogs tolchock an old veck, razrez his books, pull off his outer

platties and take a malenky bit of cutter. The U.S. publisher omitted the last chapter. in which Alex wearies of the violence that is his way of life (soddenly, in Vienna, Burgess im-personates an American gangster snaring: "We Americans are tougher than you Brits. We

want that last chapter eliminated") and it was this version that Kubrick worked from. The most shocking scene in "A Clockwork Orange," an assault on a writer and his wife. reflects the tragedy of Burgess's first marriage.

During World War II, when he was a soldier stationed on Gibraltar, his Welsh wife, stationed on Gibraltar, his Welsh wife, Llewella, was working long hours in London at the Ministry of War Transport. Leaving work one midnight, she was, in Burgess's words, "set upon by four American GIs who took her purse and tried to take ber wedding ring off. She screamed and they started hitting her. She

was pregnant at the time and lost the child and suffered for the rest of her life." Llewella Burgess, who died in 1968, never became a

"It's no good being bitter," Burgess says now. "You can go on all your life being bitter. One tends to be bitter about the American Army, but anybody could have done it. Most of all, I was resentful that f was stuck on Gibraltar and could not get home to her and that she was a victim of the war.

"And I felt that I should have had a child born in 1945; by God, he'd be middle-aged by now! Anybow, the only way to get rid of my feelings about this misfortune was to write a book in which it happens all over again."

Shortly after his wife's death, Burgess married Liliana Macellari, who translates Pyn-chon, Lawrence Durrell and, of course, Burgess into Italian.

She bore him a son, Andrea, from whom Burgess caught "middle-aged chicken pox, which rendered me sterile. The experience, though, was quite interesting. It had peculiar mental effects. It did something to the synapses of the brain and the cerebral responses, so I would be reading Ezra Pound and getting from his poems a peculiar sensuous impact — a smell! And I was getting tactile, instead of aoral, effects from music: Debussy made my body feel as if it was being touched all over

with small hammers. Staring into his beer schooner, Burgess expresses his only regret about "Ninety-Nine Novels" — the one that got away.

"I know there'll be others, but right now there's a British woman writer called A.S.

Byatt. She's a sister of Margaret Drabble; I didn't put Margaret Drabble in, either. I started to read Mrs. Byatt's books and I thought, 'My God! This is writing!' and I was rather upset that I dido't put in a book called The Virgin in the Garden,' which I thought was a

Italian, With a German Accent

by Henry Kamm

OLZANO, Italy -- Few countries, in Europe or elsewhere, bave been so well provided by history, nature and art with places that draw the traveler for their beauty and interest as Italy, and few have been so amply visited through the ages. To suggest that Italy still has towns or villages. or even nooks or crannies, that hold out pleasure to the visitor but have not yet been "discovered" by the traveling public in the age of the jet plane may seem to invite disbelief

And yet there is an entire province of Italy that is studded with beauties made by nature and man where foreign languages are rarely heard. In this province dramatic Alpine mountains alternate with meadows full of wild flowers and berries; vineyards give way to or-chards; medieval castles on the beights lord it over villages of gabled houses that cluster around steepled churches; age-old paths lead through deep forests until they reach rustic inns that dispense the excellent wines of the region and platters of home-smoked meats and bread fresh from the oven, all served with a

smile and for a song.

The province is South Tyrol, surrounded by the Dolomite Alps, which the Italians, who have owned it only since 1919, call Alto Adige. The languages foreign to South Tyrol that are so rarely heard include Italian, because the language of its people has remained resolutely and legally German. Not only they, but also most of the visitors who go to South Tyrol, are

Since the days of the Hapsburgs, who ruled all Tyrol from 1363 until their Götterdämmerung in World War I, German poets have sung the praises of the sunny slopes of the Tyrolean Alps, and travelers from all the German lands have come to savor their beauties, which are sunnier and sweeter than those facing north-

But, strangely, the rest of the world has been taking its Alpine holidays everywhere except South Tyrol. What the province's well-established and handsomely equipped tourist indus-try regrets is, indeed, a blessing for the traveler: South Tyrol suffers from only one category of packaged tourists. The many other national groups, including one's own, that spoil the illusion of having got away from it all are elsewhere, and one's illusion is safe.

It is safe even in South Tyrol's capital, Bozen to the Germans and, through its long history, Bolzano to the Italians. Both names are official. (You will rise in most people's rating if you use the German name, because it tells them that you are aware of the special character of their part of Italy.) If one leaves out -as I strongly advise - the new part of the city west of the Talvera River, an ugly product of Fascism complete with a sculptural representation of Mussolini on the wall of the tax office, the city gives great pleasure by its handsome architectural harmony and setting, which tempt and reward strolling.

Are there many towns of population sur-passing 100,000 that include vineyards within their confines and four or five medieval castles? And how many towns have the charms of containing a Dantestrasse as well as a Via Goethe? (All street names are bilingual.) Moreover, three funiculars take visitors straight from the city into the Alps in a matter of

One of the main downtown streets, Laubengasse (Via dei Portici), is a street of medieval arcades under which, in houses dating mainly from the 16th and 17th centuries that replaced

colorfully stocked fruit and vegetable market oo the Piazza delle Erbe. The frescoed and decorated facades, the gabled roofs, the 18thcentury Neptune fountain, the many stands loaded with the reddest and greenest produce of the surrounding farmlands and the bargaining that accompanies the transactions make of the Piazza delle Erbe a pleasant paradox, a place of hustle and bustle where time seems to have stood still for centuries.

Unlike the rest of Italy, which considers outside terraces on which to sip a drink and watch the rest of the world go by a luxury limited to a few expensive places, this city maintains the agreeable Germanic custom of coffeehouses. Many of the sights can thus be enjoyed in sedentary tranquility.

Before you sit down for a cappuccino or Campari, or better yet a glass of this year's wine, two streets in the center of town in addition to Laubengasse deserve attention. They are Silbergasse and Bindnergasse: Silbergasse because of the particularly well-pre-served state of its barmonious 16th-century to 18th-century facades; Bindnergasse not only for its handsome houses but also for the fact that so many of them are Gasthauser - restaurants, wine cellars and hotels - as rich in traditioo as they are in food and drink. Many display ancient forged-iron shop signs at the first-floor level.

A couple of minutes' walk from Bindnergasse, turning down either Streitergasse or Vintlerstrasse, is the Franciscan courch. In its Holy Virgin's Chapel is a magnificently carved polychrome altar of the year 1500 touchingly depicting the Nativity.

Two of the city's many churches are worth a visit for the beauty of their remaining frescoes of the school of Giotto, which had considerable influence in the Bozen of the 14th century. They are the cathedral and the Dominican church. Of more recent interest is the city hall, a fine example of Hapsburg Jugendstil, a deco-rative style of the early part of this century. Pleasant as strolls through the old city are,

they can be matched by some equally easy walks leading a bit out of the compact town's confines, most of them starting at the upper terminals of the three funiculars. One walk, in particular, ought to be on every itinerary. It begins where Laubengasse, or rather its extension, Via Museo, reaches the Talvera River. At that point starts the Wassermauer, or Passeggiata Lungo Talvera, a large embankment intended to prevent flooding. It has been turned into a verdant promenade along the river, and the stroller who takes it walks through vineyards and past castles, all the while surrounded by views of the Alps.

The first stop, reached in a lew minutes, is Maretsch Castle, dating from the 13th century. Still in the heart of the city but set amid vineyards, the restored castle now serves as the city's convention center. Its frescoed rooms can be visited Monday through Friday, and its restaurant, closed Sunday, is a good place for a quiet meal in a princely setting. The fare might include Schlutzkrapfen, fist-size ravioli filled with spinacb and smothered in melied butter and grated parmesan cheese, or Spinatspatzen, spinach-filled gnocchi in a sauce made of cream, bam and cheese. The main course might well be a goulash or a bollito misto, an Italian assortment of boiled beef, chicken, tongue or other meats. Even if one has a carafe of local wine, 16,000 lire (about \$10) a person ought to

The next castle, Klebenstein or San Antonio, nade, past the San Antonio bridge. It is a family property and not open to visitors. Keep the steep part takes only about five minutes.

Runkelstein dates from 1237 and is beautifully preserved. It is so typical a medieval castle that one can be forgiven for believing that Walt Disney designed it. After a long history of changing from one princely family to another, it was given by Emperor Franz Joseph to Bozen as a gift. The glory of Runkelstein is its frescoes, a marvelous compendium of scenes from medieval feudal and court life that continues from wing to wing, from hall to hall, and that may be visited only with a guide from 10 A.M. to noon and from 3 to 6 P.M. Tuesday to Saturday.

The restaurant is a good place for a cold lunch. A piatto misto, consisting of the Tyrolean Speck — a smoked delicacy midway be-tween bacon and ham — with salami and cheeses, costs little more than about 5,000 lire.

Ao additional dividend for having climbed the road to Runkelstein is the view. The surrounding mountaintops and slopes are almost crowded with castles, towers and other fortified structures delving the world outside, and deep below, the Talvera River courses through

Of the many pleasant excursions for which Bolzano serves as the center - and the variety is so great that only personal inclination, the weather and recommendations of local people and the helpful tourist office can dictate a choice - a brief tour into the wine-growing region southwest of town bas been popular through the centuries. Imagine great expanses of vineyards sloping down from hills over which tower the Alps. Picture in this majestie setting dabs of forests, sparkles of lakes and brooks and a profusion of castles and villages, each built around a slim-spired church.

A pleasant drive of less than an bour through Eppan (Appiano) and Kaltern (Cal-daro) brings one to Tramin (Termeno), a village from which the Traminer and Gewürtztrainer wines, white and flowerly in bouquet, take their oames. There are many places to stop, even on so short a jaunt, and the trip can be extended at one's leisure; the vines and the slopes, the streams and the Alps remain just as

I stopped at the Wine and Castle Museum outside Kaltern, boused in Ringbert Castle (open from 2 to 6 P.M.), looked at churches and had a snack of Speck, home-baked bread and a carafe of Gewürtztraminer in Tramin. It was worth perhaps more than the 6,000 lire or so that it cost to sit at a quiet table on the village square being greeted by swarms of chil-dren oo their way home from school.

For those who prefer not to rent a car, buses provide frequent service from the municipal bus terminal to any of the places named at fares ranging from less than 1,600 lire to about

About an hour north of the city by superhighway lies Brixen (Bressanooe), one of the few towns anywhere that is not only beautiful for itself and its surroundings but also has a botel, the Elephant, that I would visit just for the experience.

Besides the Elephant. Brixen offers all the delights of a well-preserved ancient Tyrolean town that has the advantage of being a bishop's. seat. That means an imposing cathedral, with a cloister whose vaults are covered with beautiful, naive frescoes of the 14th and 15th centuries, and a stately Renaissance bishop's palace. There are other churches worth looking into, and charming areaded streets. About two miles to the north, there is the interesting complex of Neustift (Novacella) Convent, remarkable for flamboyant Baroque basilica, its rococo library and the astonishing round, fortified Chapel of St. Michael

Trains reach Brixen from Bolzano in about an hour and are preferable to the bus, which offers only highway vistas.

© 1984 The New York Times

The Best of Burgess earlier wooden buildings, modern shops disgoing toward the castle, which towers on the rock ahead, even if the going gets a bit steep. Runkelstein (Roncolo) Castle is worth it, and play a variety of wares that attest to the continuing prosperity of this mercantile town. A walk up Laubengasse leads to the richly and Kennedy Toole ('A Confederacy of mor and gave him less than a year to live — which be found "rather exhilarating. . Moving Day for Malaysian Elephants

by Hari S. Maniam TUALA LUMPUR, Malaysia — About 70 Malaysian soldiers and game wardens are tackling a big problem — saving 15 elephants trapped on a one-kilometer-wide (.6-mile-wide) island. The operation involves tranquilizer guns, army as-

ault boats, divers and explosives. The island appeared when the surrounding area was flooded for construction of the Kenyir Dam, a hydroelectric project about 200

cilometers northwest of Kuala Lumpur. The national park department director, Misliah Mohamed Basir, loubts that catching the elephants will be difficult. Two or three tame elephants will be used as decoys, and the wild elephants will be shot with

ranquilizer guns and then chained. The problem, she says, is getting the elephants across 50 kilometers of looded area — with water 60 meters (nearly 200 feet) deep in places —

to the nearby National Wildlife Preservation Forest. This is where the army is helping. Lieutenant Andenan Abdul Rahman, who is leading about 40 soldiers rom the 2nd Engineering Squadron in the rescue mission, says they save built a 10-meter-by-12-meter raft out of planks and 217 empty oil Four army assault boats will tow the raft, which will he tested first with tame elephants aboard.

The raft could hold two to three tranquilized elephants at a time, but to avoid risks it has been decided to take them one by one. The journey could last from one to several hours, depending on obstacles, such as underwater logs and vegetation. Army divers have been called to clear away the obstacles with explosives.

Shariff Daim, head of the elephant unit in the game department, says eight wild elephants, including five females, have been tranquilized and

captured since the roundup on the island began earlier this month. Chained by the front legs, but still free to move about the island, these elephants were captured without tame decoys. The decoys may be

needed for liercer elephants. Shariff and other elephant experts have deduced from footprint studies that at least 3 herds, totaling 15 elephants, remain free on the island. There is enough food on the island, especially bamboo shoots, to feed the elephants for two months, and sugar cane and bananas are

Malaysia's elephants, estimated to mumber 200, are generally a smaller breed than their African counterparts. To prevent their extinction, the hunting of elephants is forbidden here.

STOCKS and **HOLLYWOOD STARLETS**

As contrarians, we mocked the bearishness of the Street. In July 1982, while the DOWS were drooping below 800, we predicted that the "DJI WILL TOUCH 1,000 BEFORE HITTING 750", for we realized that "Sponsors" were absorbing shares at wholesale prices. To ignore Sponsorship is to by-pass one of the primary forces in the market; for stocks, like starlets, are "made" not "born"; both require the doting attention of Power Elitists.

Most analysts do not understand the nuances of Sponsorship; the methods used by Elitists to accumulate or to distribute stock positions. To concentrate only upon prosaic yardsticks in an effort to fathom equit

In July 1983 a prestigious investment service published a list of 67 romantic stocks to buy or to hold; "sexy" cult stocks, selling at more than

25 times earnings. Our researchers rebuked their report, noting that the shares had bloated measurements; that they appeared to be under distribution, flowing from strong to weak hands.

Time has sustained our observation; all but five of the alluring pets have

In debunking "highflyers" we urged readers to buy Oils, subscribing to the poetic lines that "Value, like Noble Blood, will out." And now?

Many Oils have spudded to two year highs.

Despite corrections, we believe the DOW will catapult above 1500. All markets will not thrive; there are areas of vulnerability, particularly Japanese shares and newly "discovered" Nordic equities. Three weeks ego we suggested the purchase of a N.Y.S.E. "junior" oil around \$12, alluding to a possible "leveraged buy-out". In 14 trading sessions, the stock has advanced to \$17, with a potential target of \$24.

Other winners can be cited, including "special situations" that escalated \$100%

Our current letter focuses upon over-sold "seniors" selling at less than five times earnings, stocks with evidence of Elitists' accumulation.

Our researchers also review two incubating companies that may emulate the success of a NESTLE'S, or DENISON.

arryl Strawberry limbers up at the Mets' camp in Florida.

With His Mentor Gone, Strawberry Must Bloom on His Own

By Thomas Boswell

Washington Post Service ST. PETERSBURG, Florida - Almost every spring training brings with it one player with a special aura of possibility.

This year, the man with that overburden of potential and the extra weight of pressure upon him is Darryl Strawberry, the slender [101-6, 2]-year-old right fielder of the New Mork Mets who was the National League Mokie of the year last season.

In the recent past, players like Mark Fidrych, Fernando Valenzuela and Cal Ripken Jr. have drawn universal stares before their sophomore seasons because of

to have their potential defined by statistics. The old hands muse and say, "Might hit 30 home runs some day" or "Could win 20." A few phenoms, however, defy this swift

The scouts and general managers mutter their approval of Strawberry's scythelike swing but decline to offer any scythelike swing but decline to offer any concrete opinion. They've been burned too often before in this chancy game of pre-

limits of conventional baseball vocabulary. One of his teammates, Keith Hernandez, who tied for the National League most valuable player award in 1979, says: "He has unbelievable raw power. He beats [Garry] Templeton as the most amazing

vey. He's got that low-ball tater [home run] swing I was awed by some of the bome runs he hit last season." Strawberry has the euphonious name,

rookie I've ever seen." Hernandez adds:

"He reminds me of a young Willie McCo-

New York City. ger also has some solid credentials. Last more I put into it, the more I'd get out. He season, after batting .161 in his first 24 was always on me to get to the park earlier, games and being benched for a week for to study the pitchers more, to think more. lackadaisical play, Strawberry became as potent a hitter as the league possessed over

Despite all this, Strawberry seems acutely volnerable to second-season failure. And for an odd reason.

sour spring. Coach Jim Frey made Straw-berry his special project. Now, Frey has gone to Chicago to manage the Cubs. No one misses him more than Strawberry.

"Basically, he was an uncle to me when things were really going badly." Strawberry says of the former Kansas City manager some fascinating aspect of their rookie the striking build, the cheerful face, the years. Now, it's Strawberry who's alone on appealing cockiness and buoyant manner mostly because of Jimmy. He was special appealing cockiness and buoyant manner mostly because of Jimmy. He was special to set minds dreaming, especially the sort to me. He was a straight talker when I of minds that manufacture celebrities in needed to hear some of that. He told me how great I could be if I just did one thing The much ballyhooed left-handed slug- - work harder. He promised me that the When a man takes that kind of time

with you, it gives you confidence."

dicting greatness. Instead, they retreat behind gratingly cliched yet evocative adjectives like "unlimited" and "awesome."

numbers: 26 homers and 74 runs batted in, in 420 at bats. His slugging percentage of the habits of fading stars like Dave Kingman and George Foster. "I got all over tives like "unlimited" and "awesome."

512 — the highest in the Mets' history — Darryl, but he took it well," Frey said Strawberry is already exhausting the was perhaps the best indication of Straw-recently. "I just let him know that talent wasn't enough and that I was going to stay

on it because I cared about him." "I was afraid that Frey might be giving him too much too soon," recalls Hernan-Last summer, when Strawberry had a dez. "But Darryl is an intelligent young

> "I tried to keep my advice to him simple," Hernandez says. "He was so worried about the curveball that he was freezing on fast balls right over the plate. I told him the same thing that Lou Brock told me years ago: Why go to the plate looking for your weaknesses? If you like fastballs, then sit on the fastball" - that is, wait for that

Frey left Strawberry with several years' worth of tips and technique condensed into

First, he got the rookie to stop trying to pull every pitch. "Once he got me hitting the ball the other way, making solid contact on pitches on the outside corner, I felt like no pitcher could get me out," says

Next, Frey told Strawberry to stop swinging so much on pitches early in the

for certain pitches in certain zones," says Strawberry. "Jimmy would tell me what to look for." Also, Frey taught him how to adjust his stance and to guess pitches be-fore the pitchers made their own adjust-

United Press International Katarina Witt on her way to the world women's singles title.

Witt Wins Gold Medal In World Figure Skating

OTTAWA - Katarina Witt of East Germany, the Olympic champion, delivered a compelling per-formance to win the gold medal in women's singles at the World Figure Skating Championships.

Anna Kondrashova of the Soviet Union finished second, and Elaine Zayak of the United States was

Witt, a clear winner in both the compulsories and the short program, completed her sweep of the three disciplines Wednesday night with an enchanting freestyle routine. It included a perfect execution of a difficult double lutz and triple toe loop.

The 18-year-old earned four marks of 5.9 for artistic interpretation and five 5.8s. The world title was the first for the two-time European champion, who placed fourth at last year's world event and was runner-up the year before.

"I came here to win the gold medal because I was the Olympic champion," she said after her victory. "I wanted to win bere, too. I was not surprised." Witt will not get a well-deserved

rest for a while. "I'll do the exhibition tour and then have some days off for rest," she said. "For the next year, I'll skate, and I want to win the worlds again."

Kondrashova, the Soviet champion who finished fifth at the the Olympics last month.
Olympics, earned marks ranging Judges from Hungary,

pointing sixth at the Olympics, pulled up from sixth overall after the short program by placing sec-ond to Witt in the long portion. The 18-year-old American presented an intricately woven routine, bolstered by a triple toe and double loop combination in what was likely her last amateur event.

After her disappointment at Sarajevo, Zayak's medal here provided a measure of redemption. "I wanted to come back as a fighter," she said. "I think I showed everyone that I could do it again."

Kira Ivanova of the Soviet

Union, the Olympie bronze medalist, was third entering the long program but dropped to fourth overall after failing to execute a double axel and a triple lutz

The Olympic silver medalist Rosalynn Sumners of the United States, passed up the Ottawa event, ■ 6.0s for Torvill and Dean Jayne Torvill and Christopher

Dean, Britain's Olympic champions, received three perfect marks of 6.0 for their Westminster Waltz as the ice dancing competition began Thursday with the compulsories, The Associated Press reported.

The perfect scores marked the first 6.0s in a compulsory event awarded at the world championships. The couple earned three , perfect marks for the same dance at

Judges from Hungary, Britain from 5.3 to 5.7 for technical merit and Switzerland awarded the perfect marks. Five judges, including sion. The crowd felt the scores were too high and roundly booed them.

Zayak, who was the 1982 world from the Canadian judge.

Last season, Sampson averaged 19.1 points and 11.7 rebounds per game. He blocked 103 shots and altered countless hundreds more. But as his teammates have discovered, Sampson's value extended be-yond statistics.

Tim Mullen learned that he could no longer thrive as a 6-5 small forward with a good jump shot and switched to guard. Edelin, who suffered a shattered cheekbone early in the year, discovered that playing center in reserve is one thing, playing it regularly is some-thing else. Edelin is now a forward. Despite the loss of Sampson and all the changes, Holland says this season has been easier on him.

"Teams don't prepare for us as 7 30 2 22 325 221 hard as they did before." Holland 29 39 7 45 276 309 27 40 28 287 fenses anymore. Laboring on Fantasies

By Russell Baker N EW YORK — Look. I'm not ashamed to admit it. I've spent a lifetime struggling to be like most people, and a lot of the time it's been hard work, but it was worth it because I knew that when other people were asked ahout me the answer would be, "Oh, he's nothing

special — just like most people."
You will understand, then, why I was appalled by the recent news in The New York Times that most

people have seven or eight sexual fantasies every day.

At the upper end of the scale were people who had 40 per day. No wonder American productivity is approaching zero. Until then I had thought the reason nobody answered the phone in the afternoon was that the whole country was sleeping off its after-lunch hang-

On the day these statistics were published, at least three days had passed since I had had a sexual fantasy, and while the study showed that there were, indeed, some people who had none per day, I was clearly far below the norm.

Naturally, I decided to try moving up to the seven-or-eight-perday average. Never one to flinch from drudgery. I started rising an hour earlier, thinking I could fit in at least two good fantasies before hreakfası.

Have you ever tried wallowing in thoughts of carnal excess while scratching an unshaven jaw, yawning and watching a publicitystarved author discuss "parenting" with Bryant Gumbel, After four mornings, all I had to show were black circles around the eyes and one-and-a-half fantasies so uninteresting that I won't bore you with their content.

Discreetly, I consulted friends. When did they find time to do their fantasizing? Most hlushed and pretended they hadn't heard me right, but a young man — clearly in the 40-per-day category — said. "Find time? Man, I can't find time for

anything else." Most who dodged the question. ! suspect, were having their fantasies on company time and didn't want to admit they were shortchanging the boss. I began trying this myself. Results were not bad at first

By telling the switchboard operator) was in conference and not to be disturbed, I could, while pretending to study a hatch of office memorandums, spend an uninter-rupted 30 minutes in a moderately amusing sexual fantasy.

In this way I got my average up to one per day. Obviously, devoting 30 minutes to a single fantasy was inefficient. If I cut each fantasy down to four minutes, I could get in seven and a half per day, exactly like most people.

Of course, this tight schedule required an agenda prepared in ad-vance, with seven and a half ideas for famiasies all ready at my finger tips the minute the half-hour be

I will be frank. I hated the lourminute fantasy. It was too short. There was no room to maneuver in. no space to create complications. In fact, it had all the defects of writing a newspaper column.

Moreover, accustomed to writing newspaper columns, I couldn' force myself to repeat the same fantasy. Whereas people will listen to the same song repeatedly for 40 years and still appland, a columnist who repeats his material will he booed out of the business.

If I had been a songwriter, would have been psychologically capable of having the same fantasy seven and a half times a day sever times a week. As a newspaper columnist. I was consututionally incapable of the repetition and, so. needed 52% new ideas every week simply to be like most people.

When desperate for new column ideas I call friends, relatives, colleagues, asking, "Do you have a good column idea?" It was only natural, then, that I started phoning friends, relatives and colleagues to ask. "Do you have a good idea

for a sexual fantasy?" Though amused at first, these people soon spoke discreedy to loved ones very close to me. They, in turn, urged me to take a vacation. While doing so with a friend wise in psychiatry, I was brought hack to reality. "If you were a songwriter," he explained, "having the same lantasy seven and a half times a day would be the norm. As a newspaper columnist, having not a single idea for months at a time makes you perfectly normal.

New York Times Service

By Phil McCombs \mathbf{Crime} Washington Post Service

WASHINGTON — Stealing and raping are exciting, and criminals commit crimes because they like to, says Stanton E. Samenow, a psychologist who is a strong voice in a growing "psychi-atry of responsibility." Samenow is becoming something of a celeb-rity with his new book. "Inside the Criminal Mind." in which he declares firmly: "Criminals cause crime — not bad neighborhoods. inadequate parents, television, schools, drugs, or unemploy-

Freud, the man with an excuse for everything, is dead. And crim-inals, says the author, know the difference between good and evil and prefer evil.

"A gun-toting, uneducated criminal off the streets of southeast Washington, D.C., and a crooked Georgetown husiness executive . . . regard the world as a chessboard over which they have total control," he writes. "and they perceive people as pawns to be pushed around at will. Trust, love, loyalty, and teamwork are incompatible with their way of life."

If evil is a savage enticement. trying to be good and to live a responsible life can be difficult. But Samenow's 15 years of working in prisons, clinics and halfway houses has convinced him that criminals can he persuaded to confront the reality of their lives. and to choose to lead different. better ones.

Once, after he'd outlined his views in a lecture to a group of corrections and mental health workers, a clergyman in the audience came up and said: "This is so old, it's new.'

Samenow, 42, an intense man who seems comfortable in his starched white shirt, hlue blazer and striped tie, rocks in a swivel chair in his office in Alexandria, Virginia, arms waving, voice soaring at a high pitch.

It's hard getting people to un-derstand, he says, Criminals are truly different from ordinary, responsible people.

For example, he says, there was newspaper interviewer the other day, and when he told her the typical criminal "expects the world to go his way and expects immediate service and all this kind of thing, She said, Well, this Lawbreakers Are Responsible, Not Society,

sounds like the man I was married to.' She said I was making 90 percent of the male population

He shakes his head. "It's a maner of degree, and we're talking about a person whose entire way of life is predicated upon the view that the world is there to suit him .

and when things do not go as he wants, he will take matters into his own hands, caring not who he injures, and running afoul of the law repeatedly. "If somebody had told me all

this stuff 124 years agn, I would have said, 'Bunk.' I didn't believe a hit of it I was totally in the deterministic mold, the Freudian nerspective. Now I am just 180 degrees the other way, and I've had to be convinced of it.... Who wants to believe this? It's a very grim picture, a very chilling

The typical criminal, he says, commits hundreds of crimes, his mental life a rich dreamscape of depredations. While anyone may fantasize about crime, the crimi nal can't pass a store without thinking of robbing it; and he frequently follows through, often drinking or taking narcotics to overcome inhihitions and shut out fear and remorse. Manipulative and arrogant, he never thinks he will be caught. He sees responsible people as dullards.

With a criminal, says Samenow, the last thing you want to do is build self-esteem. He's already got plenty. "People have taken psychoanalysis and applied it to explaining criminal hehavior. Freud never worked with criminals, and Freud never really purported to explain criminal behavior," he says.

Criminals love the Freudian approach, Samenow adds, They learn to fool the psychiatrists [by playing the psychiatric game of mouthing insights. . . By tak-ing the position that the criminal is a victim, society has provided him with excuses [and] supported his contention that he is not to

The idea of criminals as victims has been widely held since the late 19th century. Now, at a time

change.

Psychologist Samenow: "A very chilling picture."

when there is little public sympathy for criminals and voices are raised in favor of tougher sentencing, the experts seem to offer little hope for reforming criminals.

Samenow says he knows how. A native Washingtonian, Samenow, Yale '63, worked with the late Dr. Samuel Yochelson to ublish "The Criminal Personalin 1976-77. Based on research in the wards for the criminally insane at St. Elizabeths Hospital, the two-volume work has come to be regarded as a classic.

Samenow had gone to work for Yochelson at St. Elizabeths in 1970 when he was fresh out of graduate school with his degree in clinical psychology. Yochelson, a classical Freudian, had begun his work at the hospital by prohing the psyches of the inmates judged by the legal system to be criminally insane - to discover what forces had shaped them. The theory was that exposing these forces would effect a cure. But gradually Yochelson and

FOR SALE

COTE D'AZUR

NEAR CANNES

his young protégé realized it wasn't working. They came to view the inmates not as sick, hut as hrilliant manipulators of the legal and psychiatric systems. The criminals, as Yochelson and Samenow came to call them, didn't reform under classical therapy. They did, however, learn.

"Dr. Yochelson treated rapists using psychoanalytic concepts and techniques," recalls Samenow, "and what he found was, he then had rapists with psychiatric insight."

Yochelson and Samenow developed a method for changing criminals into responsible citizens, and Samenow has been using it in his private practice since he left St. Elizabeths in 1978. During that time, he says, a third of the 100 hard-core but nonviolent criminals he has treated have gone straight. Measuring recidivism is an imperfect art, but Samenow says this is a good success

Samenow's cases often come

PEOPLE from local probation offices, so he begins work with criminals when

they may be dissatisfied with life

outside the law and want to

Under the Yochelson-Sa

menow theory, the therapist "begins with holding the criminal completely accountable for his

offenses." Samenow writes. Rath-

er than listening to problems, the therapist describes typical crimi-

nal thought patterns and suggests that the criminal thinks this way,

The armed robber "was told

that none of his hard-luck stories

were relevant," writes Samenow of one case. "The circumstances

of his life were of no concern. He

was not a victim. At the heart of

this program is the premise that

man can choose between good and evil. . . There would be nothing in the program to make [him] 'feel better' about himself.

... Rather, in order to change

he would have to grow intensely fed up with himself."

Gradually, the therapist teach

es the criminal how to "deter"

criminal thinking — how, for ex-ample, to quickly think of some-

thing else when he sees a woman

and rape flashes through his mind. "In short," writes Sa-

menow, "the change process calls

for criminals to acquire moral val-ues that have enabled civilizations

All this is time-consuming - a

year or more of weekly or even

and therefore enormously costly.

Samenow thinks this may be one

reason that no programs in the

Washington area have formally adopted his techniques.

don't necessarily huy it all," says Norman Carlson, head of the fed-

eral prison system, for which Sa-menow has done consulting. "But

I personally think Stan has some

good ideas, . . , Instead of put-

ting a guy on a couch and talking about his Occipal conflicts and

all that, he tries to confront them

with the reality of their behavior.

and I think for many inmates

"This is a tough approach to

crime," Samenow writes, tough

because some criminals will have

to be locked up for a long time. It

is tough because it stipulates that

far more is necessary to effect

significant and lasting change

than current theories or practices

that's where it's at."

Not everyone is enthusiastic. "I

daily sessions is not unusual

to survive.

Yoko Ono Breaks Earth For Strawberry Fields'

Yoko Ono, accompanied h John Leonon's two sons. Sean and Julian, pushed a gold shovel into the rain-soaked earth in Central Park in New York Wednesday to Park in New York Wednesday to hreak ground for Strawberry Fields, a tear-shaped patch of land in honor of Lennon that will feature 25,000 strawberry plants. Lennon was shot to death on Dec. 8 1980, by Mark David Chapman. The 25-acre Strawberry Fields, named for one of the Beatles' higgest hits should be completed by this time next year. Onc. 51, is donating \$1 million for landscaping and other work, and for upkeep. work, and for upkeep.

Barbara Streisand, was named commander of arts and letter.
Wednesday night at a champagnt
reception hosted by Jack Lang. the French culture minister. The cere-

mony ended a week of public ap-pearances in Paris for the promotion of "Yentl," the film Streisanc directed, produced and played the leading role. The film depicts the story of a young girl who disguise herself as a boy in order to study the Jewish Torah. . . James Herriot, perhaps the world's most famous veterinarian, Wednesday received the first individual aware from the British Tourist Aumorit in London. Herriot, author of bestselling books about his life as a Yorkshire vet, received the awar in his proper name, Alfred Wight "He has entertained millions an has done much to hring a greate has done much to hring a greate awareness of Yorkshire throughou. has stopped writing but still prac tices as a vet, and says these day. ists upwards, every day. As the dogs and cats flow out, the touris flow in. I never dreamed for a min ment when I hegan telling people about Yorkshire that they would come to see it.". The Los Arreles Urban League honored jaz vocalist Ella Fitzgerald, who be came the first woman ever to receive the group's annual Whitney M. Young Jr. Award. Fitzgerald who bas won !! Grammy aware during her more than 40-year sin. ing career, was honored for he outstanding contributions towards the improvement of racial equal (1) ty." The award is named for Winey M. Young Jr., the former Union League executive director will died in a boating accident in 197
